

CONGRESS PREPARES TO ADJOURN SHORTLY

SENATE PRACTICALLY THROUGH AND WILL BE READY TO ADJOURN TUESDAY OR WEDNESDAY.

SIGNS CAMPAIGN BILL

Measure Providing Complete Publicity of Campaign Expenditures Receives President Taft's Signature—Accept Cotton Bill.

Washington, August 19.—With its legislative wheels practically clear, Congress today prepared for adjournment by Tuesday or Wednesday of next week. The senate is practically through and awaiting action by the house on the senate amendments to the cotton tariff bill and the compromise Arizona-New Mexico statehood bill. This will wrap up the session.

Accept Cotton Bill. The house today means committee today decided by a strict party vote to accept the cotton tariff bill with amendments and call it up for action Monday.

Signs Publicity Bill. Pres. Taft today signed the campaign publicity bill making the measure a law. It provides for complete publicity of campaign expenditures of candidates for house and senate before election and limits the amount each can spend in a single campaign to \$5,000 for house candidates and \$10,000 for senate candidates.

But Two Big Measures. After five months and four days of increasing grind, the Congress of the United States today was able to show but two big legislative measures made into law—the Canadian reciprocity agreement and the bill for publicity of campaign contributions before election.

Sweeping Amendments. Washington, Aug. 19.—Asserting that the Supreme Court of the United States yielded to "the hordes" and wrote into the Sherman law, what Congress never placed there, Sen. La Follette this afternoon introduced and discussed in the senate a sweeping series of amendments to the anti-trust law, designed to make any restraint of trade unreasonable.

Agree on Tuesday. Adjournment of congress at five o'clock Tuesday was virtually agreed upon at a conference today between Vice President Sherman, Senator Penrose, and democratic leader, Underwood.

FIVE ARE RESCUED FROM SINKING BOAT BY ASTOR'S YACHT

Wireless Message Received at New Haven Reports Rescue by Yacht Carrying Colonel and Flancon.

New Haven, Conn., Aug. 19.—A wireless message received today told of the rescue of a crew of five sinking in the ship, Zingara, off Boston's Point, Long Island Sound, during the night. The rescue was effected by Col. John Jacob Astor's yacht, Sonja, on which the Colonel and his fiancée, Miss Madeline Force, were cruising to Newport. Astor assisted in and Miss Force and father watched the rescue.

MOTHER IS SUICIDE; CHILD IS STARVED

Four-Year-Old Girl is Imprisoned in Room With Dead Mother; Police Rescue Her When Nearly Dead.

Washington, Aug. 19.—Four-year-old Virginia Peterson, almost dead from starvation was rescued this afternoon by the police from a locked room, where for days she was held prisoner by the dead body of her widowed mother, a suicide. An empty bottle labeled carbolic acid told the story.

CARELESS BOYS SHOOT AT ANIMAL; HIT MAN

Man Working in Woods is Mistaken For an Animal by Band of Boys Who Shoot Without Making Sure.

Marquette, Wis., Aug. 19.—Struck by a bullet, and possibly fatally injured, August Claus, an employee of the Northwestern railroad is lying in a hospital at Crystal Lake, Mich., today, the victim of the first hunting accident of the season in this territory. Claus was working in the timber; he wore a brown shirt which caused a hunting party of boys to fire on him, thinking him an animal.

Appleton Company Has Certified It Paid Former State Senator \$155 for Lobby Work.

Madison, Aug. 19.—The Wisconsin "Traction, Light, Heat & Power" company of Appleton certified today to lobbying expenses of \$155 paid to former State Senator Henry Lockney of Wausau.

THOROUGH DEFENSE OF WORKMEN'S ACT ASSERTS LEGALITY

Attorney General Answers to Brief Filed to Bring Action to Test Constitutionality of New Law.

Madison, Wis., Aug. 19.—A thorough defense of the workmen's compensation act as a measure conforming to constitutional requirements is the answer of the attorney general of Wisconsin in the brief of the state against granting the application of the Flier & Stowell company, Thomas J. Nease and Walter Reed, Milwaukee, for leave to bring action in the supreme court, in the name of the state, to enjoin the execution of the new law. It recommends the application be denied.

The brief was written by Deputy Attorney General Russell Jackson. Although justifying the law for its beneficent intent, Mr. Jackson confined his argument principally to the constitutional aspects.

Law Made Optional. "Whatever may be the economic aspect of such legislation," says Mr. Jackson in his argument, "it must justify itself ultimately, however, as being conformable to constitutional limitations, and it is with this phase of the subject only that we are concerned. We believe it must be conceded that it is at least extremely doubtful whether a compulsory workmen's compensation act or employers' liability act, as such legislation is commonly termed, can be drawn which will meet the requirements of the state and federal constitutions in their present forms. Consequently, and to avoid all constitutional inhibitions, the law was made optional as to all who might otherwise be heard to insist upon their constitutional guarantees, a liberal time being afforded within which both parties concerned might determine to elect to accept its terms.

Contentions Unfounded. "It is contended that sections 2391-1 and 2394-2, which abrogate the so-called assumption of risk and follow servant defenses, will operate to deprive the employer of the free exercise of the elective privilege extended to him, and that the act, accordingly, while optional in form, is coercive in effect. This contention is, we believe, wholly lacking in merit for the reason that the defenses abolished are not constitutional rights, but are at most court-made, common law defenses, or rules of public policy which the legislature may qualify, abolish or continue at libitum. The Massachusetts act, which is also optional, and which was sustained by the supreme court July 24, 1911, not only deprives employers who do not elect to come under the act of the fellow-servant rule and assumption of risk defenses, but also of the defense of contributory negligence."

Further Holdings. The brief holds it was entirely competent for the legislature to abolish these defenses in the manner provided and to make the abrogation thereof conditional upon the election of the employer to accept the limitations afforded him by the compensatory provisions of the act. The brief continues:

"The applicants, Flier & Stowell company, have not and do not, evidently, intend to come under the act. The only way in which they will be affected by it is through the abrogation of the assumption of risk and follow servant rule defenses. It being within the power of the legislature to abolish these defenses, their complaint with that of the other applicant taxpayers is limited to the alleged invalidity of the industrial accident board. This board, however, has been superseded by the industrial commission and any amendment to include the new board would avail applicants nothing on account of the many other duties reposed in the commission which it may perform without question."

Case Irrelevant. "The action of Borgia et al vs. The Falk Co. the record of which is printed in applicants' brief, has absolutely nothing to do with this matter, and calls for no further comment than that it will receive such consideration as it requires when reached. Furthermore, the objections urged therein may be fully met by a construction to the effect that the act has no retroactive operation and would not apply to bona fide contracts made prior to its passage."

Each section of the act is considered separately in the brief, and given approval. In conclusion the brief says:

"Should the court grant the leave prayed for, the act will have gone into effect as to all of its provisions, and numerous cases will undoubtedly have arisen throughout the state affording ample opportunity for the presentation to the courts of the arguments here advanced, long before the contemplated suit could be briefed, argued and determined."

SUES COMPANY FOR \$20,000 DAMAGES

Milwaukee Man Brings Suit Against Eucyrus Co. for Alleged Permanent Injuries Received.

Milwaukee, Aug. 19.—Declaring a heavy weight fell on him, injuring him for life, William J. Adams, a millwright, filed suit against the Eucyrus company her today for \$20,000 damages.

MAKING READY FOR THE BIG ONES.

NEW CONSTITUTION OF PORTUGAL SIGNED

National Assembly Accepted New Document for Republic at Early Hour This Morning.

Lisbon, Aug. 19.—The national assembly completed and signed the constitution of the republic of Portugal at 1:25 this morning. There were joyful demonstrations and great crowds around the building when the news of the signing was received.

WRONG IMPRESSION REGARDING SALARY

Assessors of Income Tax Will Not Be Paid According to Limit Which Law Provides.

Madison, Wis., Aug. 19.—An erroneous impression has been given by articles in several state papers which have undertaken to show what the salaries of income tax assessors would be by computing five cents on the thousand upon the county assessment and assuming that the sum thus obtained would be the exact salary of the assessor of income. As a matter of fact, there is nothing in the income tax law which requires that salaries be fixed upon this basis.

Salary Provision. Section 1057 of the law provides that "The salaries of the assessors of income and their deputies and assistants shall be fixed by the state tax commission, but such salaries, together with the expenses of such assessors and their deputies and assistants shall not in any year exceed in amount five cents for every thousand dollars of the valuation of all property as fixed by the tax commission in the state assessment of the preceding year."

This is seen the limitation is upon the total amount which can be expended in the estate. Certain counties may receive more or less than their proportions, and it is not unlikely that the expenses of postage, office rent, deputies, traveling, etc., may constitute a larger item than the salary of the income tax assessor.

Economy Expected. There is no authority for the assumption that the tax commission will expend all the law allows. On the contrary, the commission will no doubt make every effort to administer the law with the least amount of expenditure, consistent with thoroughness and efficiency. In this connection it is to be remembered that the assessors of income will, after Jan. 1, perform the duties of supervisors of assessments, and thus save the various counties something like \$25,000 or \$40,000, which is the estimated aggregate of their salaries and expenses for a year.

HUSBAND IGNORANT OF WIFE'S SUICIDE

Husband of Noted Authoress, Myrtle Reed, Sent Telegram to Her Last Night From Fond du Lac.

Chicago, Ill., Aug. 19.—Despite the fact that James Sydney McCullough, husband of Myrtle Reed, the noted authoress who committed suicide, ignorant of his wife's death, sent her a telegram from Fond du Lac, Wis., last night, asserting he would arrive home early today, nothing had been seen of him up to noon today. Mrs. McCullough left an estate of \$250,000.

HIGH WINDS TODAY MADE ATWOOD STOP IN HIS LONG FLIGHT

Aviator Atwood is Forced to Discontinue His Long Distance Trip Today Because of Severe Head Winds.

Erie, Pa., Aug. 19.—After bucking head winds and dangerous air currents in his twelve mile flight from Fairview where he was forced to alight last night, Aviator Harry S. Atwood, landed here at 12:04 this afternoon thoroughly exhausted. He will not attempt to fly on unless the winds recede. Atwood is now only 625 miles from New York, well ahead of his schedule. Since leaving St. Louis he has traveled 739 miles.

GRAND ARMY GATHER FOR FIRST SESSION

Commander-in-Chief Gilman and Staff of Boston Arrive in Rochester For Annual Encampment.

Rochester, N. Y., Aug. 19.—Commander-in-Chief Gilman and staff of Boston have arrived here for the forty-fifth annual encampment of the Grand Army of the Republic, which will open Monday. The trouping of one hundred old battle flags will be a feature. The contest for the next commander-in-chief will be a warm one. Col. John McElroy, editor of the National Tribune, Washington, and Judge Harvey M. Trimble of Princeton, Ill., are candidates.

YALE STAR OFFERED PLACE AT MADISON

Frederick James Murphy Has Been Offered Position as Coach at University of Wisconsin.

New Haven, Conn., Aug. 19.—Frederick James Murphy, Yale football and basketball star, has been offered a position as athletic coach at Wisconsin University.

Lumbermen at Astoria. Astoria, Ore., Aug. 19.—Today was "too hot" on the calendar of the Astoria Centennial celebration and the festivities of the day were participated in by several hundred lumbermen and logging camp operators from many points throughout Oregon and Washington.

It's the Little Things That Count

To be convinced TRY a Want Ad in The Gazette. Our Want Ads fulfill almost any WANT. Turn to our Classified page. The man or woman who wants help is there. The man or woman who wants a job is there. The real market place for buying and selling of EVERY kind is centered on our Want Ad page. Look and learn.

ANNUAL WATER FETE TO BE HELD AUG. 27

Event at Lake Kegonsa Will Take Place in Front of Parker Cottage—1,000 Guests Expected.

Stoughton, Wis., Aug. 19.—The annual Lake Kegonsa water fete will be held Aug. 27 probably in front of the George S. Parker cottage. Mr. Parker, A. F. Tetzel and Dr. W. Helm are in charge of the meet. Fully 1,000 campers attend. Former Governor J. O. Davidson will act as "patron."

ARREST EMBEZZLER AT DETROIT TODAY

John C. Cyland, Former Cashier at Richmond, Ky., Bank, Taken in Detroit Today.

Detroit, Mich., Aug. 19.—John C. Cyland, once a Kentucky legislator and former cashier of the Richmond, Ky., Deposit Bank, who embezzled \$18,000 was arrested here today after a chase of 18 months.

GAINS WERE SHOWN IN STOCKS TODAY

New York, Aug. 19.—The stock market was strong at the opening, a substantial gain being made in the first few minutes while the supply of stocks continued extremely scant. Union Pacific advanced three-quarters and there was much covering on the up turn. Steel also developed a strong tone.

BRINKLEY WILL TRY FOR BETTER RECORD

Declared That He Could Have Gone Higher if He Had Had Warmer Clothing.

Chicago, Ill., Aug. 19.—Oscar A. Brinkley, aged 26, mechanical engineer, who ascended 11,726 feet in his Wright biplane yesterday, breaking the world's record for altitude, asserted today if dressed warmer he would have gone a mile higher. He will dress warmer and try again.

TYPEWRITER COMPANY IS FORMED TODAY

The Harris Typewriter Company of Fond du Lac Was Today Incorporated With Large Capital.

Fond du Lac, Wis., Aug. 19.—The Harris Typewriter company filed articles of incorporation today with capitalization of \$355,000, and purchased the Wells factory building at \$30,000. The factory will employ one thousand people. The incorporators are: P. B. Huber, P. D. Wyatt, and F. M. Givens.

New York Has Fly Exposition. New York, Aug. 19.—The National Household Show opened in Madison Square Garden today, with a miniature fly exposition among its leading features. During the week of the show, visitors will see the fly, the new disease germs and explain the best methods for its extermination. Prizes will be awarded to the boys who kill the most flies.

VETERAN HOSTS ARE ASSEMBLING TODAY IN ROCHESTER, N. Y.

Advance Guard Of Delegates To National Encampment Of G. A. R. Beginning to Arrive in City, Which Plans Profuse Entertainment.

Rochester, N. Y., August 19.—Red, white and blue are the predominating colors in this city today. Everywhere they meet the eye. In the countless flags waving in the breeze from every flagstaff in the flower city, in the many miles of hunting with which public buildings and housefronts in general and particularly those along the line of march, are profusely decorated and in thousands of "floats," excellent light bulbs, strung in garlands across the streets or massed at the crossings of the most prominent thoroughfares. This patriotic display of the national colors is a pleasing sight to the grizzled veterans of the civil war who are arriving here with every train to attend the national encampment of their organization which will be held here next week.

The arrangements for the reception of the veterans are complete and in perfect working order. The arriving members were received by committees of the local posts at the train and escorted to their respective department headquarters, where the visitors were equipped with literature and every information they required or desired.

The headquarters of Commander-in-Chief Gilman of the Grand Army of the Republic was opened at the Hotel Seneca this morning and all day long rooms were filled with visitors, among them many department officers who came to pay their respects to the Commander-in-Chief or to confer with him about some details of the arrangements for the coming week. The headquarters of the other patriotic organizations which will also hold their annual encampments in this city next week, among them the Woman's Relief Corps, the Ladies of the G. A. R., the Sons and Daughters of Veterans, ex-Prisoners of the War and Army Nurses were also opened.

Next Monday will be devoted to the reception of arriving veterans and other visitors, to an exchange of visits at the various departmental headquarters and to business sessions of the executive bodies of the various organizations. On Tuesday the various organizations, excepting the Grand Army of the Republic will hold sessions for the transaction of business during the day and in the evening all will attend the semi-official opening of the G. A. R. at Convention Hall, presided over by Commander-in-Chief Gilman. The trouping of about a hundred old battle flags, under the direction of J. Payson Bradley, chief of staff to the commander-in-chief, will furnish the spectacular feature of the gathering. There will also be music and singing and Gov. Dix, Mayor Edgerton and other distinguished men will deliver addresses.

Wednesday will be a busy day. The grand parade of the Grand Army of veterans and of the allied organizations will start at 10 o'clock in the forenoon and will travel over a line of march two and one-half miles, leading through level and well paved and shady streets. The reviewing stand, having a capacity of 4,000 seats, is on Clinton Avenue south, and there the column of veterans will be reviewed by Commander-in-Chief Gilman, President Taft, Gov. Dix and Mayor Edgerton. It is expected that the parade will last five hours, quite a task for the old men, many of whom are quite infirm.

On the evening of the same day the veterans will have their big campfire at Convention Hall and there they will listen to stirring music and addresses by distinguished commanders and pay a tribute to the memory of the former comrades who have gone to their last rest during the past year.

The business session of the encampment will not begin until Thursday. Several important subjects will come up for discussion, among them the protest against the placing of the Gen. Lee Statue in the Hall of Fame. The question of electing a new Commander-in-Chief does not promise much excitement, as it is generally conceded that Col. J. McElroy, past second vice commander-in-chief, has practically no opposition as candidate for the post.

The election of officers in the Woman's Relief Corps promises to be more interesting, as there are already four candidates in the field for the position of president, which Mrs. Belle C. Harris, of Elmora, Kan., will vacate. The outcome of the election is awaited by the members of the organization with considerable interest and the friends of the candidates are working for their respective choice.

LEAPS FROM WINDOW AND DIES INSTANTLY

Patient at Milwaukee Hospital Became Temporarily Insane and Leaped to His Death.

Milwaukee, Wis., Aug. 19.—Becoming temporarily insane during the night, it is said, a patient at St. Mary's hospital named Durs, who is said to be a traveling man from Minneapolis, leaped from a second-story window early this morning, killing himself instantly.

BLOODSHED ATTENDS TROUBLE IN WALES; IS FIRST VIOLENCE

TROOPS FIRE ON MOB AT RAILWAY STATION KILLING TWO MEN AND WOUNDING TWO OTHERS.

ASK AMERICAN AID?

If Strike Is Protracted English Union May Ask Help from American B. of L. E.—Traffic Demoralized Throughout Island.

London, Aug. 19.—The strike was attended with bloodshed this afternoon at Llanelli, Wales, where the troops fired on a mob killing two men and mortally wounding two others. Violence Reported.

Previous to this the report of the disorders was confined to disorders in northern towns. Violent attempts to damage railroads are few and isolated. In some instances rails were torn up, wires cut, and signal boxes wrecked, trains stoned and obstructions put in way but they were discovered in time to avert accidents.

May Call on America. Eight hundred railway clerks at Fintona Station agreed to fill the places of the strikers and were assigned to duty. The official railway men's union stated that if the strike were protracted the English Union would feel the pulse of the American Society of Locomotive Engineers and would ask the latter organization for assistance. More stranded Americans succeeded in getting away this week than was anticipated.

Confusion at Depots. Railway terminals were scenes of confusion but no violence. Large parties of Americans bound for Scotland and other places, however, were unable to proceed. All railway lines' trains were running but service was greatly restricted and under the protection of soldiers and police.

Traffic Demoralized. A quarter of a million men have joined the general railway strike. General demoralization of traffic prevails. In twenty-four hours every road in the United Kingdom will be at a standstill it is asserted. A remarkable feature of the strike is the good order and lack of violence.

Although the food situation is bad in London and Liverpool, the government is taking precaution to relieve the situation. The home office this afternoon issued a reassuring statement. Women Win-Out. 15,000 women factory workers many out for weeks and starving won their strike today when the firms recognized their union and granted the increased wages.

Government Optimistic. Various conferences are on in an effort to settle the strike. Government officials declared the situation is optimistic.

Disease Threatened. Liverpool, Aug. 19.—All power is cut off in this city, saloons and restaurants are closed and famine conditions prevail. The stench of uncollected garbage is horrible and unless something is done disease, which can hardly be combated, will add to the horrors of the strike. Mobs led by hungry women today attacked the cold storage warehouses for food.

TO HOLD EXAMS FOR TITUS' SUCCESSOR

State Civil Service Commission Announces Examinations for First Assistant Attorney General.

Madison, Aug. 19.—The Wisconsin state civil service today announced a competitive examination for candidates for first assistant attorney general, \$3000 a year, to succeed A. C. Titus, who is ill. Over the entire state in October examinations will be held for local income tax assessors, salaries \$800 to \$1,500.

ONE WILL RECOVER; TWO PERSONS DEAD

Auto Accident is Fatal to Two People—One Man, Although With Skull Crushed, Will Recover.

Milwaukee, Wis., Aug. 19.—At the Milwaukee hospital it was learned this afternoon that W. R. Cunningham of Lynchburg, Va., who suffered a crushed skull in the automobile accident last night near Pewaukee in which William D. Forgan, a prominent Chicago lawyer and his wife, were killed, will recover. The bodies of Forgan and wife were today shipped from Waukegan to Chicago.

BIPLANE IS FAVORED OVER THE MONOPLANE

Major Samuel Rivers, Who Has Watched Trials Everywhere in the Interest of Government, Deems Them Best.

Chicago, Aug. 19.—It was learned today that Maj. Samuel Rivers of the United States army who has watched aviation meetings broadcast as the government's representative, will endorse the biplane for more practical and safe army use over the faster and more dangerous monoplane.

ANOTHER VALUABLE PEARL WAS FOUND

Gerald Whitford of Edgerton Discovers Rare Specimen at Camping Place in Fulton—Other News.

Edgerton, Aug. 19.—Gerald Whitford of this city who is camping with a party of friends in Fulton township, yesterday found the finest and most valuable button pearl ever taken out of the waters in this section. The specimen was fished out below the dam at Indian Ford in Rock river and is said to weigh nine grains. The gem is nearly perfect and its luster is almost equal to a diamond.

Personal News. Mrs. Christa Bowen returned last night from a visit of ten days with friends in Lansing, Iowa.

Rev. T. W. North of Stevens Point has arrived on a visit to his father, Thomas North.

Mrs. Josephine McReynolds and two sons returned yesterday after an absence of nearly two months which was spent with the lady's parents in Escobedo and relatives in various parts of Minnesota.

Mrs. Whitcomb is here on a visit to her father, Thomas North and other relatives.

W. E. Davis and Sverre Amundson made a drive to Evansville yesterday on business.

Earl Knott and bride, after a week's visit with Mr. and Mrs. August Gohart, departed yesterday afternoon for their home at Davis Junction, Ill. The couple were recently married and spent part of their honeymoon here.

Mrs. Clara Hange entertained the force of lady clerks of the department store at a 6:30 dinner at her home last evening, the occasion being enjoyed immensely.

Rev. G. E. MacInnis, pastor of the M. E. church of this city for the past two years, has been extended an unanimous invitation by this congregation for the pastorate for another year. It is sincerely to be hoped that he will be returned to the Edgerton charge at the annual conference to be held in Antigo in September.

The Junior League of the M. E. church last night held a penny social in the basement of the church. One hundred children were present and of the articles sold about \$10 was realized.

Quarterly Conference. The fourth quarterly conference of the M. E. church was held here Thursday afternoon. Rev. John Reynolds of Janesville, district superintendent, conducting the same. At the close of the session D. W. North was elected lay delegate and George Hain alternate to the general M. E. conference to be held at Antigo in September.

Church Announcements. Services at the M. E. church Sunday morning at 10:30. Pastor MacInnis will take for his subject, "Mystery and Revelation." Epworth League at 6:30 p. m.

At the Congregational church Sunday there will be services both morning and evening. Rev. L. A. Parr of Geneseo, Ill., will preach at both services. Union services in the evening.

At St. John's German Lutheran church Sunday there will be mission services in the morning and afternoon. Ministers from abroad will be present to assist in the services.

TRAIN ROBBER TELLS OF DEED

Denver Police Say Prisoner in County Jail Has Confessed.

Denver, Colo., Aug. 19.—A prisoner in the Denver county jail, giving the name of Frank M. Watson, is alleged to have confessed that he and two companions held up the Southern Pacific Overland limited at Reese, Utah, on the night of January 1, when William Davis, a negro porter, was killed and nearly 100 passengers were relieved of their valuables.

According to the police, Watson says his accomplices were Joseph Collins of Omaha and R. M. Roberts of Mullen, Neb.

It is also stated that Watson has confessed complicity in the robbery of the Oregon Short Line Interoceanic special three miles west of Ogden on the morning of June 27, 1910.

SOTHERN AND MARLOWE WED

Well Known Actor and Actress Are Married in London.

New York, Aug. 19.—E. H. Sothern and Julia Marlowe were married in the registry office at Knightsbridge, near London. The couple left the Hyde Park hotel, where they had been staying, and have gone on their honeymoon to Devonshire, where it is understood they have taken a house.

Both Mrs. Marlowe and Mr. Sothern have been married before. Mrs. Marlowe was the wife of the late Robert Taber, an actor from whom she was later divorced. Mr. Sothern was recently divorced by his first wife, Miss Virginia Harwood, also an actress of note.

Where the Blind Ride Free.

Blind people are now permitted to ride free on the street cars of Glasgow, Scotland. The local town council has distributed a variety of brass tokens among the various institutions for aiding the blind, and an ordinary car ticket is given in exchange when a token is presented by a blind person desiring a free ride.—Popular Mechanics.

Inevitable.

If a man were paid for doing the things he likes to do he would at once begin to want to do something else.

STEEL PLANT SHATTERED: FOUR KILLED, MANY HURT

Explosion of Gas Wrecks Foundry at Illinois Mill in City of Joliet.

Joliet, Ill., Aug. 19.—Four men were killed, four were fatally injured and nine others suffered injuries in an explosion that wrecked the molding building at the Illinois Steel company's plant and imprisoned 100 men.

A ladle of molten metal was overturned on the wet floor of the foundry. The explosion, which resulted, blew off the roof of the building. The smoke, flame and gas that followed blinded the men so that they could only grope for the escape. Shops adjoining the foundry were also filled with gas and flames and several men were carried out unconscious. Half-blinded by a deluge of scalding steam, a hundred who had escaped serious injury labored to reach the prisoners.

The Dead: ERICKSON, OLAF, molder; body not found, buried under debris and roof. KOSLOWSKI, WILLIAM, laborer; burned by molten metal, skull crushed. TWO LABORERS missing, thought to be under debris.

The Seriously Injured: COLLINS, PATRICK; head and body badly burned. JOKICH, MARTIN; crushed from waist down, both feet amputated and right arm crushed. CHASE, BERT, burst, crushed, left leg crushed, burst.

POYAN, FRANK; burned about face, left leg and right foot crushed. Nine more men suffered fractures of various sorts and about forty were painfully scalded by the steam which filled the building just after the explosion.

The ladle which fell contained tons of molten steel. When the fiery mass touched the wet floor the entire building was converted into a tremendous steam laden boiler with a pressure of thousands of pounds and no safety valve. In effect, the entire building exploded. The walls leaped outward and the tiled roof dropped in, burying with it the four men who were killed and the thirteen who were fatally or seriously injured.

Relatives and friends who began flocking to the plant at the sound of the explosion saw the danger and started the work of rescue at once. They were aided by the uninjured men inside the walls.

Of the hundred workers who escaped, four-tenths were suffering from more or less severe scalds. Those who were farther away from the falling ladle were uninjured, but the many who had been working near it were enwrapped by the steam before they had a chance to flee.

FLYER ATWOOD HAS MISHAP; LANDS IN FIELD NEAR ERIE

Loose Brace on Aeroplane Ends Day's Flight at Swansville—Travels Only Two Hours.

Swansville, Pa., Aug. 19.—What he called one jump brought Harry N. Atwood, the aviator from Cleveland, O., to Swansville and landed him 81 miles nearer his destination in his picturesque aeroplane flight from St. Louis to New York. A loose brace on his aeroplane compelled Aviator Atwood to alight in a field near Swansville. Swansville is seven miles from Erie and 81 miles from Cleveland, from whence he started.

The damage to the machine is not serious, but repairs will be necessary and the aviator announced he would not attempt to resume his flight until his machine was repaired. Atwood is two days ahead of his schedule and therefore can afford to "loaf."

A fast mail train which left Cleveland 20 minutes after him, failed to catch up. Atwood even made headway until he was 30 miles ahead of the train. Dispatchers who were keeping account of the aviator's passage shouted to the passing train: "He's 30 miles ahead and gaining on you."

Passengers crowded the windows and vestibules of the coaches, but caught no glimpses of the aeroplane. Atwood's actual flying time was 2 hours and 7 minutes. The flight entitles him to credit for soaring over parts of five states—Mississippi, Illinois, Indiana, Ohio and Pennsylvania. He is now 727 miles from his starting point in St. Louis and 538 miles from New York.

During the afternoon the wind abated somewhat, however, and Atwood decided to take to the air, with Erie, Pa., as his objective point. There were close to 50,000 persons on hand when he sent his Burgess-Wright biplane soaring over Euclid beach park at 4:03 o'clock. He made three attempts before rising, his engine failing to work properly.

Although Atwood had received a request from the Ashtabula chamber of commerce to stop there, he scooted over the city at the rate of a mile a minute. This is 48 miles from Cleveland.

It was between Ashtabula and Swansville that the brace became loosened and Atwood picked out the first favorable spot on which to alight.

Missouri Woman Dies at 113. Springfield, Mo., Aug. 19.—Mrs. Rachel Abbott, 113 years old, believed to have been the oldest person in Missouri, died at her home in Howell county.

Good-Tonic. Have your food, double your drinking water, trouble your consumption of pure air and quadruple your laughter.

MILTON.

Milton, Aug. 19.—W. P. Clarke left yesterday for Independence, N. Y., for a brief visit with his daughter and family. Mrs. Clarke, who has been there for several weeks, will return with him. This is Mr. Clarke's first visit to his native state since coming

to Wisconsin in 1856. Mrs. S. L. Spaulding is having her eyes treated in Chicago.

Mrs. Clara Strong of Chicago is visiting her sister, Mrs. L. C. Randolph.

Rev. M. A. Drew will preach at the S. M. church tomorrow.

Mrs. Myrtle Croxley of Fatima, Ill., is visiting the Croxley's.

Annual meeting of the W. C. T. U. at the home of Mrs. B. I. Jeffrey, Tuesday afternoon.

Mrs. G. R. Ross has returned from Kramer, Ind.

Mrs. Nora Reach was a Chicago visitor during her vacation.

Miss Keefer of Chicago is a guest

of Mr. and Mrs. E. C. Wood.

Mrs. S. B. Harburt of Evanston, Ill., is visiting her sister, Mrs. L. E. Walker.

Mrs. Meggett of Janesville is also there.

H. C. Curtis and wife of Waupun have been in town this week.

W. L. Crandall returned from his California trip yesterday.

Mrs. W. W. Clarke is visiting friends at Oakholm.

Geo. L. Shumway has gone to Hollywood, N. Y., to visit relatives.

William Davis of California, an old time resident of the village and a veteran of the 13th regiment, visited W. P. Clarke and other friends Friday.

A. J. Wells is in a critical condition from heart trouble.

Jas. G. Bond is a very sick man, being a victim of acute Bright's disease.

Mrs. M. H. Spiegelhalter of Louisville, Ky., is visiting her daughter, Mrs. W. K. Davis.

BRODHEAD. Brodhead, Aug. 19.—Roy St. John returned Friday from Attica, where he had been to attend the annual farmers' picnic and visit friends.

Mrs. R. J. Day went to Orfordville Friday for a stay of a day or two with friends.

Mrs. W. H. Phillips of Chicago, who were guests at the home of Mr. and Mrs. Ole Olson, returned home on Friday.

R. L. Hubbard of Chicago, is the guest of Rockwell Barnes.

Carl Doughton has returned from his visit to Montana, Washington and other western states.

Arthur Jones and sister, Mrs. A. Doughton, spent a part of the past week in Albany on account of the illness of their mother.

Peter Burns was a Juda visitor on Friday.

Mr. and Mrs. C. W. Martin of Chicago, arrived here Friday to visit his parents, Mr. and Mrs. M. T. Martin.

Miss Winifred Broderick went on Friday to make a stay with New Glarus friends.

Joe Menor played for a dancing party in New Glarus Friday evening.

Mrs. T. J. Lewis of Fennimore, is visiting her daughter, Mrs. Maud Swan and others.

Miss Tina Horne of Janesville spent part of the past week with her mother in Brodhead and attended the bond reunion.

Miss Birdie Merritt of Beloit, is visiting her parents, Mr. and Mrs. J. H. Merritt.

Mr. and Mrs. W. N. Cobb are spending a few days in Milwaukee, Elkhorn and East Troy.

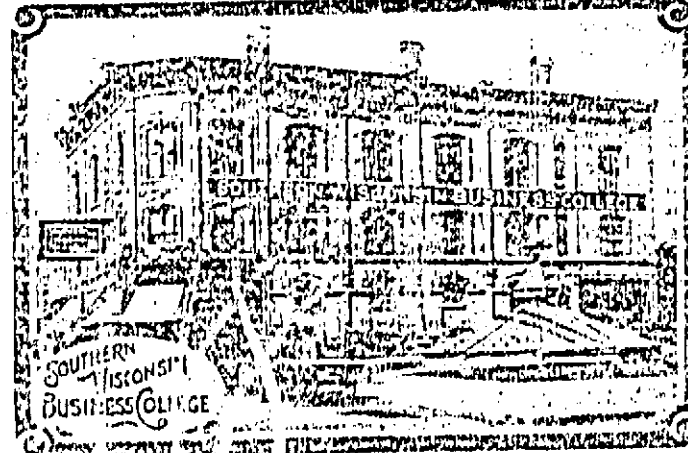

To Ambitious Young Men and Women

HERE IS A VITAL MESSAGE

You honestly believe that the world needs you—and it does. You think it is hungering and thirsting to make use of your gifts—and it is. But not just the way you have pictured it. The world will use you after its own fashion, and the grooming process will test your courage.

The school that pictures to you ease and pleasure has no interest in your ultimate welfare—it is simply after your money.

This practical age, and you must meet its needs in a practical way. The big business world has a work for you to do, a work for which it will pay you good returns in money, in ambitions realized, in happiness which comes only through congenial occupation.

POSITION AND PROMOTION come through preparation. Responsibilities gravitate to the people who can shoulder them, and POWER flows to the person who knows how. PROMOTION is the reward for those who have grasped thoroughly the science of their work, its underlying principles, and thus can acquire themselves well in any sphere of action when opportunity opens the door.

So many Business Colleges tell you that they have the BEST building, BEST equipment, BEST location, Best this and Best that, but they fail to tell you

WHAT THEY DO FOR THE STUDENT

The Janesville and Beloit Business Colleges, under the present management, have made a reputation of graduating desirable people, and that reputation must be maintained. The Janesville and Beloit Business Colleges want young men and women of good character, strong minds and energetic dispositions. To such young men and women we are offering a training that will give them a purpose in life, a training that will always be at their service. A BUSINESS TRAINING is the one thing in business that can be laid down and taken up again when needed. It cannot be mortgaged or stolen or burned. It is an asset that is better than a government bond.

Learn Chartier Shorthand

The system that can be mastered in one-half to one-third the time required to master any other system. An expert stenographer's services are always in demand at a good salary. You can be an expert if you learn the RIGHT SYSTEM of shorthand at the RIGHT SCHOOL.

IF YOU WOULD RATHER BE A BOOKKEEPER BE SURE TO LEARN ROWE'S BOOKKEEPING AND ACCOUNTING. The latest system on the market, prepared by an expert accountant of 30 years' experience. It is the simplest and most scientifically arranged and brings the knowledge of accounts within the reach of the average boy or girl.

Here's What the Janesville and Beloit Business Colleges Will Do For You

J. M. MOOSE
Principal of our Business and Penmanship Departments.

We train you to know that the world bestows big prizes, both in money and honors, for two things—intelligence and initiative.

We Prepare You For the World's Work

The world wants real men and women who can help to improve it. You can't stand still—you've got to prepare for life's work at the PROPER place in the PROPER way. Your reward will be in exact ratio to your ability and perseverance and it is therefore necessary that your training be the BEST. Today is your day—the day in which you play your part. You want to make every day count, and that is what your training will enable you to do.

Opportunities Are Open

We want ambitious young men and women who honestly want to succeed. Our schools take students of this kind and perfect them for positions as stenographers, bookkeepers, office managers or teachers in a few months. WE DO NOT PUT YOU INTO CLASSES AND COMPEL YOU TO WAIT FOR OR KEEP UP WITH OTHER STUDENTS. Then when you have finished our full Commercial Course

We Place You In a Good Position Or Refund You Your Tuition

There's nothing that stands between you and success except the START, and the sooner you make the start the sooner you step into a position of prominence and profit.

Write the School You Wish to Attend

W. W. DALE,
President and General Manager.

Write for our handsome new catalog and learn more about our courses and the opportunities that we offer. Let us advise you. We will be glad to place the facts clearly before you, which will show and PROVE that our Colleges can help you to attain the greatest possible success in your life's work.

WE SEND OUT NO SOLICITORS or agents of any kind. No school of merit ever does. The school that asks you to sign any papers or notes or pay any money in advance of your entering is always a good school to avoid. Our schools are business schools.

Fall Term Opens Sept. 5

Arrange today. Board and room \$3.50 a week. Opportunities to work for board and room.

Almost Every Day

I have the pleasure of sitting up some unfortunate friend with new teeth.

Fake teeth are not very desirable, but if one's own natural teeth are gone, why then fake teeth are the only alternative.

The better way is to look after your own teeth "in time."

Let me keep you out of the false teeth "slough of despond."

Man's Mission as a Citizen.
Some have said that it is not the business of private men to meddle with government—a bold and dishonest saying, which is to come from no mouth but that of a tyrant or a slave. To say that private men have nothing to do with government is to say that private men have nothing to do with their own happiness or misery; that people ought not to concern themselves whether they be taxed or clothed, fed or starved, deceived or instructed, protected or destroyed.—Cato, the Elder.

Misplaced Rapture.
To show the absurdity of Swedenborg's ideas, the preacher drew a graphic account of the supposed Swedenborgian heaven, with beautiful fields, fine horses, cows, etc. In the midst of his glowing description one of the sisters went into raptures, and shouted: "Glory, glory, glory!" "Hold on there, sister," said the preacher, "you're shouting over the wrong heaven!"—Success Magazine.

Carnival Disguises Stick.
Fleets, birds and animals painted in green on the faces of scores of revelers as disguises for a carnival at Las Palmas, Canary Islands, won't come off and experts say never will. A chemist named Alonzo, who did the work, was almost lynched, and 40 victims have sued him for damages.

Shoot Fish with Arrows.
Many of the natives of the islands of the South Seas are experts at shooting fish with a bow and arrow. The art is a difficult one, for the reflection of the water has to be allowed for.

JANESVILLE GAINS MORE THAN BELOIT BY THE DECISION

Line City Obtained Decision on Water, Gas and Electric Rates at a Very Great Expense.

That Janesville has gained the greater advantage than Beloit through the decision of the railway rate decision is the statement today of City Attorney H. L. Maxfield, who has carefully gone over the decision, received from the commission today. The decision is in about one hundred pages of typewritten matter and covers every phase of the business of the Janesville Water company. It is based on the decisions of the Beloit Water, Gas and Electric company and the Hudson water works and is comprehensive in all details. The rates given the Beloit and Janesville consumers are identically the same while the order regarding the installation of meters and water service pipes is similar to that in the Hudson case.

Belmont Case Expensive.
A comparison of costs of securing the decisions for Beloit and Janesville shows an advantage decidedly in Janesville's favor. While Beloit claimed to have secured a reduction of \$15,000, this amount is saved only to the consumers while an additional burden is placed on the city and the sixteen thousand dollars includes the decrease in the rates in Beloit of gas, water and electricity. In addition to this, a heavy tax burden will be placed on the taxpayers of Beloit as the result of the suit.

An attorney was appointed to assist City Attorney Harry Adams of the Line City in the case and besides the attorney's fees, experts on water were employed to appear before the commission to testify. These men received one hundred dollars per day and all expenses and the cost of the Beloit suit will run well up into the thousands of dollars.

Against this, the Janesville suit meant an expenditure, at the most, of forty-five or fifty dollars, most of which was for an extra to and from Madison and securing the services of Mr. Butler of Madison, about twenty-five dollars.

Hydrant Rentals.
In the matter of hydrant rentals for fire hydrants, City Attorney Maxfield claims that the rates in this city are less than in Beloit. There, under the decision of the commission in the Beloit case the hydrant rentals are about \$70 per hydrant, while in Janesville the rental is about \$56. However, there may be other conditions which enter into consideration with regard to the fire hydrants.

FAREWELL PARTY GIVEN TO MISS GRACE MABIE

Misses Laura and Bessie Wood entertained Last Evening at Home on South Franklin Street.

Misses Laura and Bessie Wood entertained a company of about twenty girls at their home on South Franklin street in honor of Miss Grace Mabie, who will leave the city shortly to make her home with a brother living in North Dakota. The evening was pleasantly spent with music and interesting games, and light refreshments were served. Miss Mabie has always made her home in Janesville.

LOCAL COUNCIL WILL PICNIC AT FT. ATKINSON

Janesville Commercial Travelers Will Join With Ft. Atkinson Council in Picnic Sept. 7.

Janesville Council 104 U. C. T. have been invited by the Ft. Atkinson council to join in a picnic to be held Saturday, Sept. 7th. The local order have accepted the invitation and are looking forward to a most enjoyable day. Games of all kinds including a base ball match will furnish amusement and picnic dinner will be a big attraction. It will be an all-day affair and the Janesville guests will leave at 7:30 in the morning.

DR. MILLS APPOINTED SURGEON FOR C. & N. W.

Dr. James Mills has been appointed one of the local surgeons of the Chicago and Northwestern railway during the absence of Dr. Palmer who is away on his vacation.

WINNONA PITCHER SOLD TO PITTSBURG NATIONALS

[BY ASSOCIATED PRESS.]
La Crosse, Wis., Aug. 18.—Gen. Danks, star pitcher of the Winona club of the Minnesota-Wisconsin league, was sold to Pittsburgh Nationals.

Turkey Put Up Good Fight.

An artist was sketching in a field when a full-grown turkey approached. He tried to frighten it away and it immediately struck its beak into his face. It then destroyed his sketch and, although he kicked it again and again, almost continuous blows with its beak at his eyes. He was thoroughly exhausted before his cries for help brought a golfing party and a farmhand on the scene.

Clearly Complimentary.

A writer whose Christmas money perhaps ran short, and who is obviously trying to comfort himself with the thought that "her" birthday is yet to come, remarks that "the one kind of gift always acceptable to a woman is something, anything, in cut glass." It is a wise saying, and one to be explained on the principle that like attracts like. She, like cut glass, reveals new beauties the longer you studies her.—Chicago Press.

GIRL BADLY INJURED IN FALL FROM TREE

While Picking Plums Mary Lilburn, 10 Years Old, of Emerald Grove Fell and Was Badly Cut on Barb Wire Fence.

As the result of falling from a tree and landing on a barb wire fence little Mary, the ten-year-old daughter of Mr. and Mrs. James Lilburn of Emerald Grove sustained painful injuries yesterday afternoon.

She was up in the tree picking plums when she lost her footing and was severely cut by the barbed wire in which she became entangled. Three lacerated wounds each about four inches in length were inflicted on her right leg. One of the wounds required about seven stitches.

Dr. James Mills was called and dressed the wounds. The patient was made as comfortable as possible but the wounds are very severe and will need some time to heal.

DRUNK CLAIMED HE HAD BEEN ROBBED

C. Stickney, Who Was Arraigned This Morning Said He Was Robbed and Thrown into River from Box Car.

Starting on a hunt for the men who he claims robbed him, C. Stickney, a wireworker, who was arraigned in municipal court this morning for drunkenness, never found the men he was sleuthing and did not find out until this morning where he had been arrested. Stickney was picked up in a stairway on West Milwaukee street, where he had gone to sleep. Two halves of bricks, which he had secured as weapons when he started out to find the men who robbed him were taken away from him.

According to the story told by Stickney he came to town yesterday with fifteen dollars on his person. He claims he went to sleep in a box car and while sleeping was robbed by two men. After robbing him he says they throw him out of the freight car into the river. He was broke this morning and had even lost his pilers, the tools of his trade. Sentence was suspended on his promise to get out of town immediately.

Andrew Furlong paid a fine of three dollars and costs or four dollars and was given his liberty. George Engler, another arraigned for drunkenness, paid a fine of four dollars and costs.

AUTO PARTY PASSING THROUGH HERE TO CAMP IN WOODS IN NORTHERN PART OF STATE

Party of Five Chicago Men in Automobile, Carrying Camp Equipment, Passed Through Here Today.

With their automobile decorated with the American and British flags equipped with full camping apparatus, a party of Chicago men, consisting of W. J. Dwyer, Morton Davy, R. H. Ditch, Homer Kouka, and Charles Le Saiford passed through here today on their way to the northern part of the state via Edgerton and Madison. The five were registered at the Grand Hotel for dinner, P. H. House of Buffalo, N. Y., Mr. and Mrs. T. C. Mayney, Wilson and Katharine Mayney of Riverside, Ill., and Mr. and Mrs. R. H. Lord of Springfield, were here over night at the Grand Hotel eating this morning for the Delta of the Wisconsin river.

Two auto parties were registered at the Myers Hotel today for dinner. They included Dr. and Mrs. E. F. Cleveland and Wilmer Griffith, Dundee, Ill., Dr. Frederick Cleveland and family of Chicago, Mrs. H. C. McNeil and daughter of Chicago; and Mr. and Mrs. Scopham, Canton, the Misses Ellen Toratier and Margaret Cunn and Walter Cunn of Kewanee, Ill., Mr. and Mrs. W. F. Lank, Mr. and Mrs. H. J. Bromm, Milwaukee, and Edw. J. and E. G. Lundsten of Chicago were guests registered at the Myers yesterday.

BRIEF LOCAL NEWS.

Civil Case: Today was return day in the case of the Kew Glass Manufacturing company against the Janesville Wholesale Grocery company. The case was adjourned a week.

Committee Met: Committee No. 12 of the county board on bridges met this morning in the office of County Clerk H. W. Lee and accepted two bridges which have recently been constructed in the town of Harmony.

Farmer's Meeting: A Farmer's picnic and demonstration meeting, with lectures on crop problems, will be held at the county farm on September 9th.

Suffers From Sprain: James Harris, son of Arthur J. Harris, suffered a sprained heel this morning when he fell from his bicycle and was struck by his father's auto, beside which he was riding.

Here on Furlough: Earl Brooks, former resident of Janesville for many years, is making a visit to his old home this week and renewing old friendships. Mr. Brooks, who has served for three years on the engineering corps of the battleship "Maryland," is enjoying a twenty days furlough, and is spending part of it in Janesville, where he was born. All of Mr. Brooks's friends are very glad to see him, and wish him good luck on his return to the service.

NOTICE.

All proprietors and clerks are to meet at Taylor Bros. grocery at eight o'clock, Tuesday morning to take part in the groceryman's parade.

Take Care of the Eyes.

Eye strain is certainly a factor in producing disease of every part of the eye. Old age is the time of retribution for those who have strained against their eyes.—Health.

Tabooed the Rats.

"The forewoman in our department won't allow us to wear rats in our hair," she protested, "I don't like the old rat!" suggested her friend.

BRIEF PERSONAL NEWS.

Miss Agnes Buckmaster has returned from a ten days' visit with friends at Lake Geneva.

Prof. V. C. Coulter of Warrensburg, Mo., is visiting at the home of Mr. and Mrs. C. V. Korch.

Miss Hazel Little and J. E. Cronke of Albany were in the city yesterday.

George W. Rankin of Port Atkinson transacted business in the city yesterday.

NEW ALARM SYSTEM MAY BE INSTALLED

Clinton is Considering Improved Fire Alarm System—Other News of Interest.

[SPECIAL TO THE GAZETTE.]

Clinton, Aug. 18.—A representative of a fire alarm company of Winona, Minn., was here Thursday to consult with our village board and fire company relative to installing an electric trip from the fire bell which could be operated by telephone operators at any time day or night. Every phone in the village would be an alarm box. As it is now, a person can call central and central would have to call the night operator at the C. & N. W. depot.

The new apparatus will be thoroughly discussed and investigated Monday night at a joint meeting of the board of trustees and the fire company. It seems that the scheme would be an ideal one to install and would save many very valuable minutes should the fire occur in the residence portion.

O. E. S. Picnic.
The Eastern Star picnic at the Griswold home yesterday afternoon was a great success and largely attended by the members of the order, who report a very enjoyable time.

Personal Mention.
Mr. and Mrs. William S. Northway went to Chicago Thursday to visit Mrs. Northway's brother and family and to buy fall goods. Mr. Northway will return Sunday evening while Mrs. Northway will remain several days longer.

Ten boys of S. S. Jones' Sunday school class enjoyed a very fine day at Rev. L. L. Cory's cottage yesterday at Delavan Lake. Two of the boys, Paul McKinney and Burdette Rogers, took the boys over in their automobiles.

Mrs. Nellie Grandall and daughter, Mrs. George Rogers, and child, returned to their home at Cambridge, Ill., Thursday after visiting relatives and friends here for a couple of weeks.

Neither of the cows mutilated at Shoplery a few nights ago have died as yet, but a veterinary surgeon says one of them can not live.

Mr. and Mrs. E. H. Tubbs left at 4:30 this morning by auto for Janesville so as to catch an early train to Waukegan to visit Mr. and Mrs. Geo. M. Reeder over Sunday.

Mrs. A. E. McKinney entertained a small party of young people for her grandchildren, Miss Grace and Master Raymond Switzer, yesterday afternoon. A fine picnic supper was served on the lawn.

The ball game yesterday afternoon resulted in an indifferent game which resulted in a score of 10 to 6 in favor of the Madison team. Geo. Anderson acted as umpire.

THIEVES WHO TOOK PURSE NOT FOUND

Two Men Suspected of Stealing Purse Containing Money and Gold Chain From Mrs. H. C. Klein.

Efforts to find the men, who stole a purse containing two collars and a half in money belonging to Mrs. Henry C. Klein, wife of the chief of the fire department and a gold chain belonging to their small daughter, have thus far proved futile and it is thought the men left town. The theft occurred yesterday morning while Mrs. Klein was in "Taylor Bros." grocery store. She and her small daughter had just come up the street and Mrs. Klein stepped into the store to telephone, leaving the pocketbook and some other bundles in the doorway leading to the Klein home over the store. While she was telephoning she noticed a man coming from the store and later found he had taken the pocketbook. She immediately notified her husband and word was sent to the police department. Two men followed Mrs. Klein and her daughter as they went up the street and it is thought they were the guilty parties. One of them is described as at all man wearing a straw hat while the other was short and wore a slouch hat. A search of the depots and the railway yards was made by Officer Patrick Fleming, but no trace of the men could be found. The chain was valued chiefly because it was given to the little girl when she was christened.

Fishermen Frightened.
Hunters returning to this city from a trip in the country gave the fishermen under the old Fourth avenue bridge a bad fright yesterday afternoon by firing off the charges in their guns. The shot scattered under the bridge and the fishermen, who were in boats, made a wild scramble to get to a point of safety. The police have a clue to the identity of the violators of the law regarding shooting firearms in the city and prosecution may follow.

An Impertinent Question.
"Your wife," impudently asked a massage cream advertisement, "is she as fair and fresh as the day you were married?" We are out of sympathy and accord with those who scoff at marital fidelity. In the first place; in the second place, the word-play is old and obvious. Besides, either answer might precipitate trouble.

Promise of the Future.
What is a rainbow but just clouds and every-day sunshine, far enough away to be marvelously beautiful? Some time we may see things that seem presently common and wear at hand now, even thus glorified.—Zion's Herald.

Automobiles

FARMERS RECOGNIZE AUTOS AS NECESSITY

THE VALUE OF MACHINES AS TIME AND MONEY SAVERS IS FULLY REALIZED.

CHANGE IN ATTITUDE

It Has Been Found That Cars Can Be Built That Will Be of Especial Service to the Farmer.

Farmers throughout this county as well as in nearly every part of the state and country are beginning to realize that the automobile is for them as well as for the man who lives in the city. They are being won by hundreds to favor it where they formerly considered it a machine that threatened to take from them a source of revenue by lessening the usefulness of horses.

For many years the majority of the farmers were opposed to the auto and considered it merely as a machine adapted for the use of the people who live in cities, where the good streets and roads would make their use practicable. They looked upon them just as many of the same farmers looked upon the improved harvesting machinery when the first attempts were made to introduce them generally throughout the farming districts.

These harvesters were declared unsuitable for the use of all except those who had good level land on which to operate them. The farmers who had rough or rolling land were firmly of the opinion that the self-binder never could be used to advantage on their rough land. They believed that with their limited number of horses it would be impossible for them ever to use the improved harvesters.

These men did not consider the determination on the part of the manufacturers to make their machinery adaptable to the needs of the people in general and not for a fortunate few who may have had land that was more readily farmed with the improved implements. Not until twenty years ago these conditions as well as the consideration of cost, which was thought too high and more than counterbalanced the benefit to be derived from the change were the principal factors that restrained the farmers from taking readily to the changes and benefits promised by the introduction of these new machines.

Likewise in the case of the automobile the farmers, who as a rule are very conservative in their attitude toward improvements of any nature, have held off from investigating in these new machines. At first they considered them a menace to the business of raising and marketing horses. Many were heard to murmur and to protest against the use of such machines by those of the soil.

The attitude of the farmers has undergone a great change during the last two years. The arguments offered by the majority of the farmers against the possibility of using the automobiles on other than the paved roads in and near the cities have been refuted to the entire satisfaction of all reasonable persons. The endurance tests conducted throughout this and other states such as that which was conducted through here a short time ago have helped as much as anything else to bring about this change in the views of the more skeptical persons.

Then, too, many of the farmers, who were more ready to adopt the more modern and up-to-date conveniences began to use the autos for their own pleasure. Others followed the examples of the leaders until now many of the farmers look upon the auto in almost the same light as they see the other labor saving machinery on the farm. They are overcoming the prejudice so long entertained just as they have almost universally overcome the prejudice against the telephone. When they see the doctors responding to their sick calls with much more promptness than coming to the auto than when driving horses they begin to see their own time and the energy of their farm horses would be saved very much if they too made use of the same machines.

The increase in the use of automobiles throughout this part of the state shows clearly that the attitude of the men on the farms has changed and that the automobiles are now being considered as necessities on the farms. They not only save valuable time in seasons when the work on the farm is rushing and trips to the city are necessary, but it saves more than all else the strength and energy of the farm horses. After the day is ended in the field or at the close of the week's work the horses can have a chance to rest where the auto is in use. There is no need to shorten the life of the farmers' best friend, and in the end the owner has saved much of the expense incurred in keeping his force of farm animals in shape for carrying on the work of tilling the soil.

INSURANCE FRAUDS WILL BE DISCUSSED AT ANNUAL MEETING

"Crooked" Methods Alleged To Be Employed To Be Considered At Insurance Commissioners' Convention in Milwaukee.

(SPECIAL TO THE GAZETTE.)

Madison, Wis., Aug. 19.—The methods of the accident and health departments of certain liability companies will be the subject of special consideration by the National Association of Insurance Commissioners at its annual convention in Milwaukee next week. Many complaints have come to the Wisconsin insurance department of late, and sharp dealing of some of these companies with policyholders, and the announcement that the commissioners are to take up the subject next week finds welcome response among the Wisconsin officials.

Fraud in Charge.
L. A. Anderson, secretary for the Wisconsin department, attended a meeting of the executive committee of the association at New York last June, whose health department had just finished an examination of the United States branch of the General Accident Life and Health Assurance association of Philadelphia. Its business is divided into two departments—commercial and industrial. The commercial department had never made much money. It is said, but the industrial department was a great money-maker for the home office. When the health department of the insurance commissioners' association made an examination of the company's business according to Mr. Anderson, it discovered there had been a settled policy of that company to resort to every kind of crookedness and scheming to defraud their beneficiaries.

Methods Employed.
"One favorite method of beating the policyholders out of the whole or a part of their claims," said Mr. Anderson, "was to charge that the insured had changed his occupation to some other more hazardous one. In that way it beat down claims all the way from practically nothing to five or ten per cent of what the claim actually amounted to. Another scheme was to pay the funeral expenses of a deceased policyholder, settling with the undertaker."

THEATER

"The Servant in the House."
The average playwright finds his task sufficiently arduous in itself, but Charles Harn Kennedy, author of "The Servant in the House," delves into the world of the working class by creating unnecessary tasks. Before thoroughly blocking out a play he does violence to his imagination. This he explains, is his secret safeguard against failure.

"I must confess," he says, "that the thought of sitting down to the writing of a play creates an advance attack upon my energy. A newspaper man, as you know, will do his best work under pressure. In my case, the work becomes easier when I make it difficult. The enthusiasm engendered by the conquest of a technical difficulty born of my own hard and fast rules enables me to compose as swiftly and fluently as newspaper men can write when the machines downstairs are clamoring for copy."

"Let me illustrate. In my new play, 'The Idol-Breaker,' as in 'The Servant in the House,' I will have exactly seven characters. Each of the two plays tells a story of three hours, so that the actual time of the play is the actual time of the story. In none of my plays is there a change of scene. You have noticed that every act of 'The Servant in the House' occurs in the same room of the Vinegar. The one scene in 'The Idol-Breaker' will be a blacksmith's forge."

"Again I frequently make the actor. In a certain scene—the rise and fall of emotions—keep pace with some favorite bit of Beethoven's sonata. Of course, in preserving the unities of time, place and action, I am following the Greek form of construction, because I think it is the ideal for dramatic composition and am not merely building difficulties. But I never depart from that form, no matter what problem it creates in the telling of a story of today. Limiting my characters to seven is purely a whim of my own."

"You will see, some time in the future, that all of my plays will follow the same rigid rule. I am really working on seven plays at once, of which 'The Servant in the House' is really the second. All seven will be played by seven actors; will have but one scene, and will, I am quite confident, echo my favorite music, Beethoven. Not only am I spurred to do better and swifter work by my little handicaps, but I derive the keenest pleasure from the work of overcoming them."

"The Servant in the House" will be presented at Myers Theatre Monday, Sept. 4, matinee and evening.

"It Depends on the Woman" is the name of Clara Lippman's new play.

The firm of Keith & Proctor was dissolved by the supreme court of Maine July 27.

Alfred Sutro's latest play, "The Fire Scene," will be produced by the Frohmans this season.

and when the relatives made inquiry would be informed that according to the records in the office the claim had been disposed of and payment made. But the company was very careful not to say the claim had been paid in full nor to whom. Foreigners were special marks for this method. They were ignorant and in many cases parents or relatives were in foreign countries. Some cases have come to attention where foreign consuls at Philadelphia have put up a fight and secured a fair settlement. Invariably the company preferred to settle to avoid suits.

Report At Milwaukee.
Mr. Hochstetler, superintendent of insurance for New York, stated that he had looked over the company's papers and found conditions establishing to say the least. This inquiry led to the appointment by the executive committee of a sub-committee to begin immediately to investigate the entire subject among that class, and to report to the convention at Milwaukee.

In this connection the Wisconsin insurance department has received a letter from a Wisconsin man complaining of the methods of another company of this class which paid him about \$6 on a claim for rupture. He was formerly an agent for fire, life and accident companies, so was able to present his claim properly.

"But had been able to present my claim as the average laboring man does," he wrote "I believe the company would have figured out a claim against me for presuming to be ruptured."

Experience Recalled.
Mr. Anderson recalled the experience of a conductor on a passenger train running out of Madison who complained to him some time ago of being victimized by an accident indemnity company. While removing his train box on the floor of the baggage car it fell upon his foot disabling him for six weeks. His conductor's accident policy called for a benefit of \$25 a week. The company refused, however, to pay him more than \$8 a week, entitling him to change his employment and was acting as a baggage man at the time of the injury. He was advised to fight the case and finally succeeded in getting \$100. His policy called for a payment of \$150.

Niagara Church Marks Centennial.
Niagara-on-the-Lake, Ont., Aug. 19.—St. Andrew's church of this city, one of the oldest churches in Canada, will begin tomorrow a notable two days' celebration of its 117th anniversary. The original church was built in 1794, and the present structure was built eight years ago. Many prominent churchmen from out of town will take part in the celebration.

Unrequited Census.
The world has never learned the name of the genius who conceived the idea of spreading butter upon his bread, a combination of food elements more palatable, more wholesome and more universally popular than any that the combined wisdom of all the professors who have ever lived has been able to devise.—The Epitaph.

One of Life's Little Tragedies.
He seized her, drew her to him, and deliberately struck her. She made no sound. Again, and yet again, she braved repeated blows, and still she gave no sign of suffering. But when, with rapidly growing anger, he struck her for the fourth time, she shrieked aloud—and her head flew off. She was only a match.—The Bohemian.

Drave Taunts of the World.
Dare to be singular. Be prepared to brave the taunts and sneers of the world. It has laughed at many a good man in the past and will deride many a good one in the future. Never mind it. When it finds its carping and criticism have no effect it will turn the other way, and make up for the blame by praising your grit and determination of spirit.

No Age Limit for Brains.
We are slowly beginning to realize that age has but little to do with activity and intellectual power. Nowadays every real talent and ability is respected whether the man is very young or very old.—Naples Matinee.

The Cynic.
The cynic puts all human actions into only two classes; openly bad and secretly bad. All virtue and generosity, and disinterestedness are merely the appearance of good, but selfish at the bottom. He holds that no man does a good thing except for profit. The effect of his conversation upon your feelings is to chill and sear them; to send you away sour and morose.—Beecher.

Three Men in One.
A witty writer has observed with much truth that every man is, in a sense, three different men. In the first place, he is the man he thinks himself to be; in the second place, he is the man other persons think him to be; and, finally, he is the man that he really is.

Uncle Allen.
"It isn't the fact that the papers publish so much news about crime," said Uncle Allen Sparks, "that makes me have my doubts about the world growing better. It's the fact that that's the kind of stuff the people seem to want to read."

A Hopeless Case.
"A great big, able-bodied man like you ought to be ashamed to ask a stranger for money," said the well-to-do citizen. "I know I ought," answered Meandering Miller. "But, mister, I'm just naturally too kind-hearted to tip 'em on the head and take it away from 'em."—Sketch.

I've never worn a nice new hat
But that there came a sudden shower,
And left it limp and stained and flat.
And a milliner."

Detroit to Entertain Moose.

Detroit, Mich., Aug. 19.—Detroit is putting on holiday attire in honor of the members of the Loyal Order of Moose, who are to hold their national convention and encampment here during the coming week. Though one of the youngest among fraternal orders the Moose have increased rapidly and it is expected that between 25,000 and 30,000 visitors will attend the gathering. New York, New Orleans, Denver, San Francisco and other distant cities will be represented by large delegations. An attractive program of entertainment has been prepared.

Unrequited Census.

Catholic Laymen to Meet.
Columbus, O., Aug. 19.—During the four days beginning tomorrow Ohio's capital city is to have the honor of entertaining what is expected to be the greatest gathering of Catholic laymen ever assembled in this country. The occasion will be the tenth annual convention of the American Federation of Catholic Societies, which embraces the Ancient Order of Hibernians, the Knights of St. John, the Holy Name societies, the Catholic Order of Foresters, and other organizations having an aggregate membership exceeding one million.

International Chess Tournament.
Carlsbad, Aug. 19.—Everything is in readiness for the opening here of the International Chess Masters' Tournament. The drawing will take

place at the "Kurhaus" tomorrow and play will begin promptly at 9 o'clock Monday morning. Nearly all of the most eminent chess experts of the world are entered, among them being Marshall, Burn, Teichmann, Vidmar, Schlechter, Rubinstein, Janowski, Duras, Spielmann, Leonhardt, Jaffe, Cohn, Tartakover, Salwe, Johnner, Kozie and Fahrul.

Human Clods.
It may seem a brutal view to take, but in this twentieth century the man who does not so strengthen his brain and train his hand as to rise above the dead level of the unskilled mass will remain a clod, and until the day of his death will be trodden upon.—Philadelphia North American.

With Any Number of Speeds---

The ease with which a Cartercar can be driven—even in the most crowded sections, or on the steepest hillsides—greatly astonishes old automobilists who sit for the first time at the steer wheel of a

In driving a Cartercar it is hardly necessary to remove the hands from the steering wheel in controlling the car. Its flexibility is not found in any other automobile.

Private owners, ladies and quite young boys experience no difficulty in driving the Cartercar because of its simplicity of operation and quick response to the driver's wishes.

The disc transmission as employed in the Cartercar is the most simple form of automobile construction in common use.

The clutch-and-drive protects the chain from all dirt, dirt, grit, mud and flying pebbles. It delivers a greater percentage of power than any other form of transmission and drive.

We have models, for every owner, from the man who wishes a small private runabout to the one who desires a magnificent touring car.

We have also a complete line of light delivery trucks. Call and let us give you a demonstration in one of these quiet, smooth-running automobiles, or write for literature.

SPORTS

MANY ARE PLAYING BASE BALL POOLS THROUGHOUT CITY

Partizanship is Lost Sight of in the Gambling Aspect of the Pastime.

Juneville baseball fans have gone "pool" crazy during the past few weeks. The old days when a man was a "club" or a "box" fan favored the "Tigers" or the "Giants" is over in the interest in the pooling aspect of the sport. The Gazette's sports editor is most eagerly scanned by interested fans each night and telephone calls are frequent as to results.

They range in cost from a nickel, dime, quarter, and up to a dollar. They are for the one day's result and the entire week. The names of the teams are drawn from a box by the enthusiast and his name and teams marked down on the tickets. Each day the scores his respective teams make are added and the one having the highest total score at the end of the week wins.

Of course this is gambling and comes under the law relative to such procedure. Some of the pools have amounted to over a hundred dollars and frequently they are forty and fifty dollars on the day's score. It may be interesting to know the state law on this subject and it is copied below for the information of those who care to read it.

"Section 4535. Any person who shall lose or win any money or thing in action by gambling, in any number or by any means, or by betting upon any game, election, racing, fighting, or sport, or pastime, or occurrence, in respect to anything whatever, shall be punished by fine not less than five times the value of the money or property or thing in action so lost or won."

"The statutes provide that there is a penalty to gamble in any car or station or depot and inflicts a penalty upon any trainman or agent who will permit it. Selling anything with a pretense of a prize, which is really gambling, is prohibited.

Section 4539 stipulates that any person who is custodian of a fund or a pool is subject to severe penalty.

M'VICAR TIED WITH LAWYER FOR HONORS

Both Made High Scores of Forty-four at Weekly Shoot of Janesville Gun Club Yesterday.

W. H. Lawyer and W. McVicar tied for high gun at the weekly shoot of the Janesville Gun club yesterday afternoon. Both had scores of forty-four. J. Helmer was second with a record of forty-three of the birds broken out of fifty shot at. The records of the shoot:

Dr. Gibson	42
W. H. Lawyer	44
W. McVicar	44
H. Thonetz	40
J. Helmer	43
E. P. Drake	39
H. Godfrey	39

L. L. Nickerson	35
L. L. McCarthy	35
J. McVicar	32
H. Casey	34
Helmer	30

ALL TEAMS IN CITY LEAGUE PLAY TODAY

Three Games Being Played in the Schedule of the Commercial League Two At Park and One At the Fair Grounds.

Three games are being played today in the regular schedule of games in the Commercial League, a doubleheader at Athletic Park and another contest at the Fair Grounds. With the season drawing to a close the interest in the drawing of the various teams has become keen. The Packers had been clinched the pennant without a doubt and the Y. M. C. A. is at present best choice for second place, but the Calorics have a chance to come up and beat them for the second-best honor. In the first game the Packers and the Calorics are matched while the Y. M. C. A. and Hanson take part in the second contest of the afternoon at the park. The Packers and Gazette play at the Fair Grounds.

The lineups:
Packers: Berger, lf; Nehr, cf; Hill, ss; Sullivan, 2b; Abraham, 3b; Butters, 1b; Kinsky, rf; Hallen, c; Dewey, p; Huston, sub.
Calorics: Leaver, c; Eckert, p; Ramech, 1b; Kelly, 2b; Braumond, 3b; Cronin, ss; Kirschoff, rf; Nemmel, lf; Kressin, lf.

Y. M. C. A.: Pope, c; Slocum, p; Moore, ss; Humming, 1b; Campbell, 2b; McDonald, 3b; Edler, lf; Ritter, cf; Hollings, lf.

Hanson: Vanature: Miller, c; Howard, p; Cronin, ss; A. Kressin, 1b; Hanson, 2b; H. Kressin, 3b; Schuler, lf; Osborn, cf; Enright, rf.

Plumbers: Palmer, p; Piero, c; Mathews, ss; Denzer, 1b; Miller, 2b; Hall, 3b; Micks, lf; Haley, cf; Slight, lf.

Gazette: Hyde, c; Carroll, p; O. Schmidt, ss; G. Hulse, 1b; McGilley, 2b; P. Schmidt, 3b; Smith, lf; Schubert, cf; W. Hulse, rf.

Keeps Him Hustling.
"Heaven help us," says a Georgia philosopher. "We're getting rid of the world, the flesh and the devil, and it's the devil that keeps us hustling for high water!"

Fights Scheduled For This Date.
Frankie Conley vs. Patsy Kline, 20 rounds, at Vernon, Cal.
Tony Caputo vs. Phil Schlossberg, 10 rounds, at Kenosha, Wis.

BAACK THE WINNER; DEFEATS WHELOCK

With Two Up and One Play For Olin and Olson Cup—Other Golf News.

Howard Danch was the winner of the Olin & Olson cup, defeating Warren Wheelock two up and one to play. The pair played yesterday, leaving the field clear for the first flight for the Morgan trophy to be played on Tuesday next. The games committee announce that all who are to enter must have their qualifying scores in by Monday at the latest.

Tuesday is the regular club day. There will be the customary golf play followed by the club supper and dance in the evening. These regular club days are proving very popular this summer and many avail themselves of the opportunity to visit the club house and attend the dance.

The interest however centers on the Golf Club events which comes on Labor Day. After each of the regular club performances there will be a concert by the Ting Ling Sisters, a most unique organization, who are now being rehearsed. It is planned to have the circus tent open at the top, having only side walls. It will be lighted for the evening performances by strings of electric lights.

The committee having charge of the different amusements are planning for extensive entertainments and there will be no lack of fun and merriment. A large delegation is coming from Rockford and Detroit and there will be many out of town guests for the day's delings.

LORD REPENTS TOO LATE.

In spite of the repentance of Captain Lord of the Chicago White Sox, he is likely to suffer a suspension, which will handicap the Sox for a few days. The clash came in the game with the Yankees at New York in which Capt. Lord disputed Empire Stadium and resulted in Lord being ejected from the game. A suspension is expected to follow the incident, although the fans seem to think that Lord was entirely in the right.

SETS STEPHENSON CASE DATE

Senatorial Inquiry Will Open in Milwaukee on October 2.

Washington, Aug. 19.—The special senate committee appointed to investigate the election of Senator Stephenson of Wisconsin decided to begin hearings in Milwaukee on October 2. Senator Heyburn, the chairman, said a report might be ready soon after the regular session meets in December.

ALTITUDE RECORD IS BROKEN BY BRINDLEY

Brindley Soars 11,726 Feet—Sets New World's Mark at Chicago.

FLYER'S PROPELLER BREAKS

"Jimmy" Ward Has Narrow Escape From Death—Volplanes to Safety—Earle Ovington "Lands" in Lake Michigan.

Grant Park Aviation Field, Chicago, Aug. 19.—A new world's record for altitude for aeroplanes was set in Chicago's aviation meet. Oscar A. Brindley, in a Wright biplane, climbed 11,726 feet above the earth, smashing the record of 11,150 feet set by Capt. Felix of the French army corps August 5, exactly two weeks ago, at Le Tompe.

Finding Exact Altitude.

Brindley registered 11,726 feet; Parmelee, 10,237. The scientific experts of the most locked themselves into their rooms at the Auditorium and once and started their elaborate calculations to determine the exact altitude.

The world's record is 11,332 feet, made August 5, by captain Felix, a Frenchman, in a Farman machine. The American record is about 1,000 feet lower, the one made by Arch Hoxsey of 11,400 in his ill-fated flight at Los Angeles, Cal., not being recognized, as the barograph was torn from the machine before the judges reached the spot.

Day of Sky Climbing.

It was a great day for sky climbing. In all, four aviators broke the meet record. Howard Gill in his Wright attained 8,700 feet, Lincoln Beachey in his Curtiss reached 8,532 feet. Most of the day the necks of the multitude were tilted back almost at right angles with their spinal columns.

Thrillers of another sort than the cloud chasing punctuated the day's events. James Ward's propeller went to pieces during a flight—one of the accidents most feared by aviators—and sent splinters flying in a cloud. The aviator descended in safety, however. Earle Ovington was forced to alight in the lake during the cross-lake-and-country flight to the South Shore Country club at sundown. He suffered no more serious inconvenience than wet feet. Lincoln Beachey found his hands so numb in the chill upper regions that he had to slide to earth in a half-landing spiral.

While most of the aviators were occupying themselves with cloud chasing and flying for endurance prizes, "Tom" Sopwith, the "King's Own," contented himself with walking away with first prize money in the racing events. He won first place in the monoplane speed race, in the alighting contest and in the cross-country-and-lake flight, his prize money for the day amounting to \$1,850.

CALHOUN TAKES TALKS OF POLITICS

Minister to China Discusses Illinois Affairs With Cullom.

Washington, Aug. 19.—W. J. Calhoun of Illinois, minister to China, was at the capitol and called upon Senator Cullom and other members of the Illinois congressional delegation. He remained closeted with Senator Cullom for nearly an hour, and most of the time was given, it is understood, to a discussion of the political situation in Illinois.

Humanity's Selfishness.

When we are happy we seek those who love; in sorrow, we turn to those who love us.—Cecil Raleigh.

Luckily It Isn't.

If happiness were bought at groceries there would be more complaints than ever about short weight.

RUSSIA WILL ENLARGE NAVY

Contracts for Three Battleships, Six Submarines and Nine Destroyers.

St. Petersburg, Aug. 19.—The cabinet awarded the contracts for two battleships to be added to the Black sea fleet to the Ivanoff Shipbuilding company, a combine of six Russian metalurgical machine works. The work will be done under the direction of the English firm of John Brown & Co. Each ship will cost \$9,771,025, with \$4,347,146 extra for armor and guns.

In Jail Fifty-Seven Times.

Hartford, Conn., Aug. 19.—A "Marathon" time server in the local jail began a thirty days' sentence, his fifty-seventh since 1895. He is "Patsy" Flynn, who for more than twenty years has been regarded as the jail taller and bushelmen. Flynn's usual offense is drunkenness.

New Alaskan Control Sought.

Washington, Aug. 19.—Senator Poin dexter of Washington introduced a bill extending government control over the harbor frontage on Controller bay in Alaska, over the Bering coal fields and over the railroads and steamship lines to those coal fields.

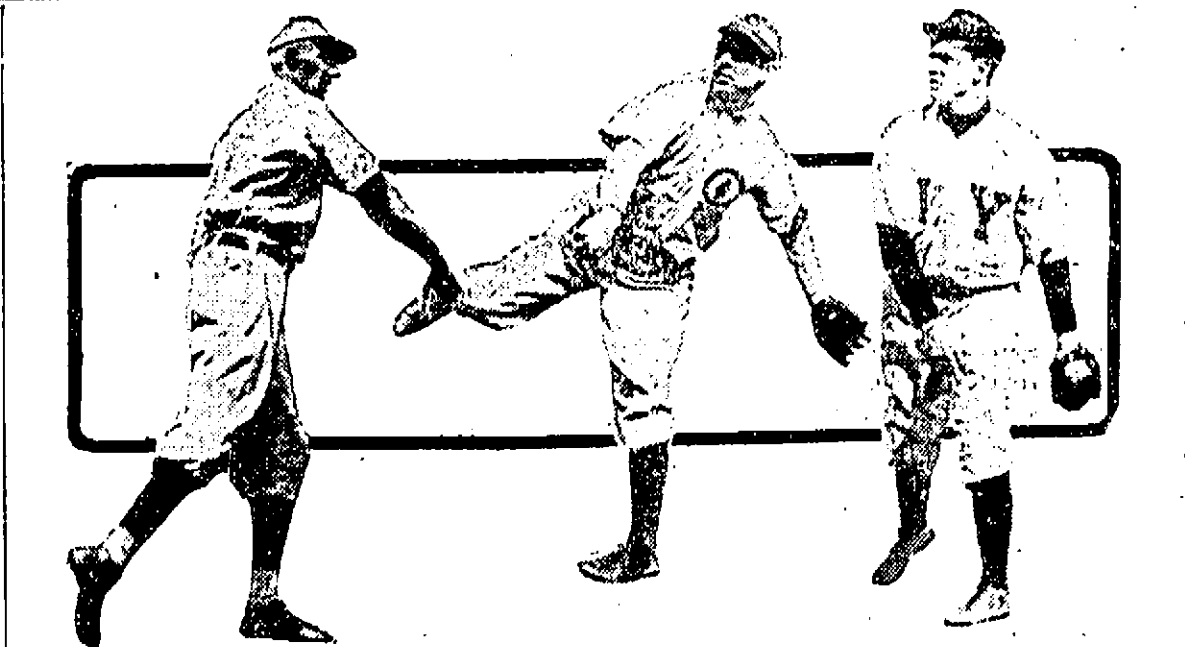

Humanity's Selfishness.

When we are happy we seek those who love; in sorrow, we turn to those who love us.—Cecil Raleigh.

Luckily It Isn't.

If happiness were bought at groceries there would be more complaints than ever about short weight.

PITCHERS IN TITANIC STRUGGLE.

At left, King Cole of the Chicago Cubs; center, 3-finger Down of the Cubs; at right Christy Mathewson of the Giants.
Chicago 11.—The Cubs and Giants in their present series are fighting as no baseball teams have so far this season. Their chances for the pennant depend considerably on the outcome of this particular series as a decisive victory for either team would give them a considerable lead in the race. The star pitchers of both teams are doing their best.

The Best Way To Get a Genuine Bargain In a Piano

is to go to a responsible house and pay a fair price for an instrument with a reputation back of it. Relieve your mind of any idea that you may have that the cheap pianos which advertised in such convincing terms, are worth spending money for. If you buy one you are speculating with the most of the chances against you.

The cost of making the kind of an instrument you want is greater than the selling prices of most of these cheap pianos—which as a rule are not good even when new.

A Piano With Excellent Staying Qualities

of tone and construction is the only one worth considering—and you had better pay a little more and know that as long as you will have it you will be glad you bought it.

We do not mean that you will have to spend an exorbitant sum to obtain a satisfactory instrument—but we do wish to caution you against the one sold at a price at which it is impossible to give you a piano of merit.

Our Lowest Priced Instrument Is Sold For \$225

It is good and serviceable and worth the money. We do not believe it would be economy for you to buy a cheaper piano. If good instruments sold for less money we would have them.

An inspection of our stock, which includes Conover, Cable, Kingsbury, Wellington, Blasius, Regent, Albrecht, Mason & Hamlin and Inner-Player Pianos, ranging from \$225 to as high as you would care to go, will give you the correct idea of values.

Chiropractic the Only True Road to Health

This 20th Century Marvel Overcomes Disease

Will You Continue to Suffer When Chiropractic Lights the Way Out? It Is Simple and Certain

Pinched nerves are the real cause of disease, wherever your trouble may be. We know that nerves supply life and motion to every organ and muscle of the body. The nerves come down from the brain through the spinal column, and pass through holes between the bones of the back like the ones in the picture. At these points nerve force is often impeded.

The brain is the store house of all intellectual force. The spinal cord and spinal nerves are the conveyors of this force. Every tissue, cell and organ within the body is directly connected with the brain by efferent and afferent nerves unless vertebral pressure is existing along some portion of the nerve tract.

Lordoscoliosis

ARROW NO. 1.
You will notice arrow No. 1 as it points to the 7th Cervical and the first and second Dorsal Vertebrae. You will find that they are one touching the other. These are called Subluxations and these particular Subluxations will cause any disease pertaining to the Throat, Bronchial Tubes and Heart such as leakage of the valves of the heart, Myocarditis, Bronchitis, Consumption, Asthma, Rheumatism of the arms, Boils about the shoulders and arms, Broncho-Pneumonia, Aphonia (lost voice), cold hands, cough cramps of hands, fingers or muscles of the arms, neuralgia and tumors.

Arrow No. 2 points to the 6th, 7th and 8th Dorsal Vertebrae which you will note, drop down one upon the other as those referred to above. These Subluxations throw pressure on the nerves to the Stomach and, of course, these conditions will cause Stomach trouble, laryngitis, lost appetite, abnormal appetite, bad taste, belching of gas from the stomach, cancer of stomach, cancer sore mouth, abscesses of stomach, indigestion, acute or chronic, ulcers, cramps of stomach, catarrh of stomach, gastritis, heartburn, hemorrhage of stomach, hic-cough, nervous dyspepsia, and sick headache.

Arrow No. 3 indicates the 9th, 10th and 11th Dorsal Vertebrae which you will note, drop down one upon the other so that the Spleen and Kidney nerves are cut off from the normal supply of mental impulses which are life and will cause such disease as catarrh of spleen, chronic inflammation of the spleen, paralysis of the diaphragm, enlargement of the spleen, abscesses, acute or chronic Bright's disease, Addison's disease, black heads, renal or kidney gravel, diabetes insipidus, Diabetes mellitus, floating kidney, dropsy, dryness of the skin, granular eyelids, hemorrhage of the kidneys, rash, nephritis (inflammation).

Arrow No. 4 shows the 2nd, 3rd, 4th and 5th Lumbar Vertebrae subluxated in the same manner. This condition is the cause of any disease pertaining to the lower part of the body such as Appendicitis, and Sciatic Rheumatism, abdominal pains, locomotor ataxia, hemorrhage of the bowels, piles, cholera infantum, chronic peritonitis, chronic rheumatism of the lower limbs, constipation, consumption of the bowels, cramps of bowels, hip joint disease, housemaid's knee, typhoid fever, lumbago, stiffness of legs, swelling of the feet, varicose veins, (or milk legs).

That spinal column No. 1, shown in the above illustration, is shorter than No. 2, is very apparent. It illustrates an abnormal condition of the spine often encountered by the Chiropractors in their extensive practice of adjusting subluxated vertebrae.

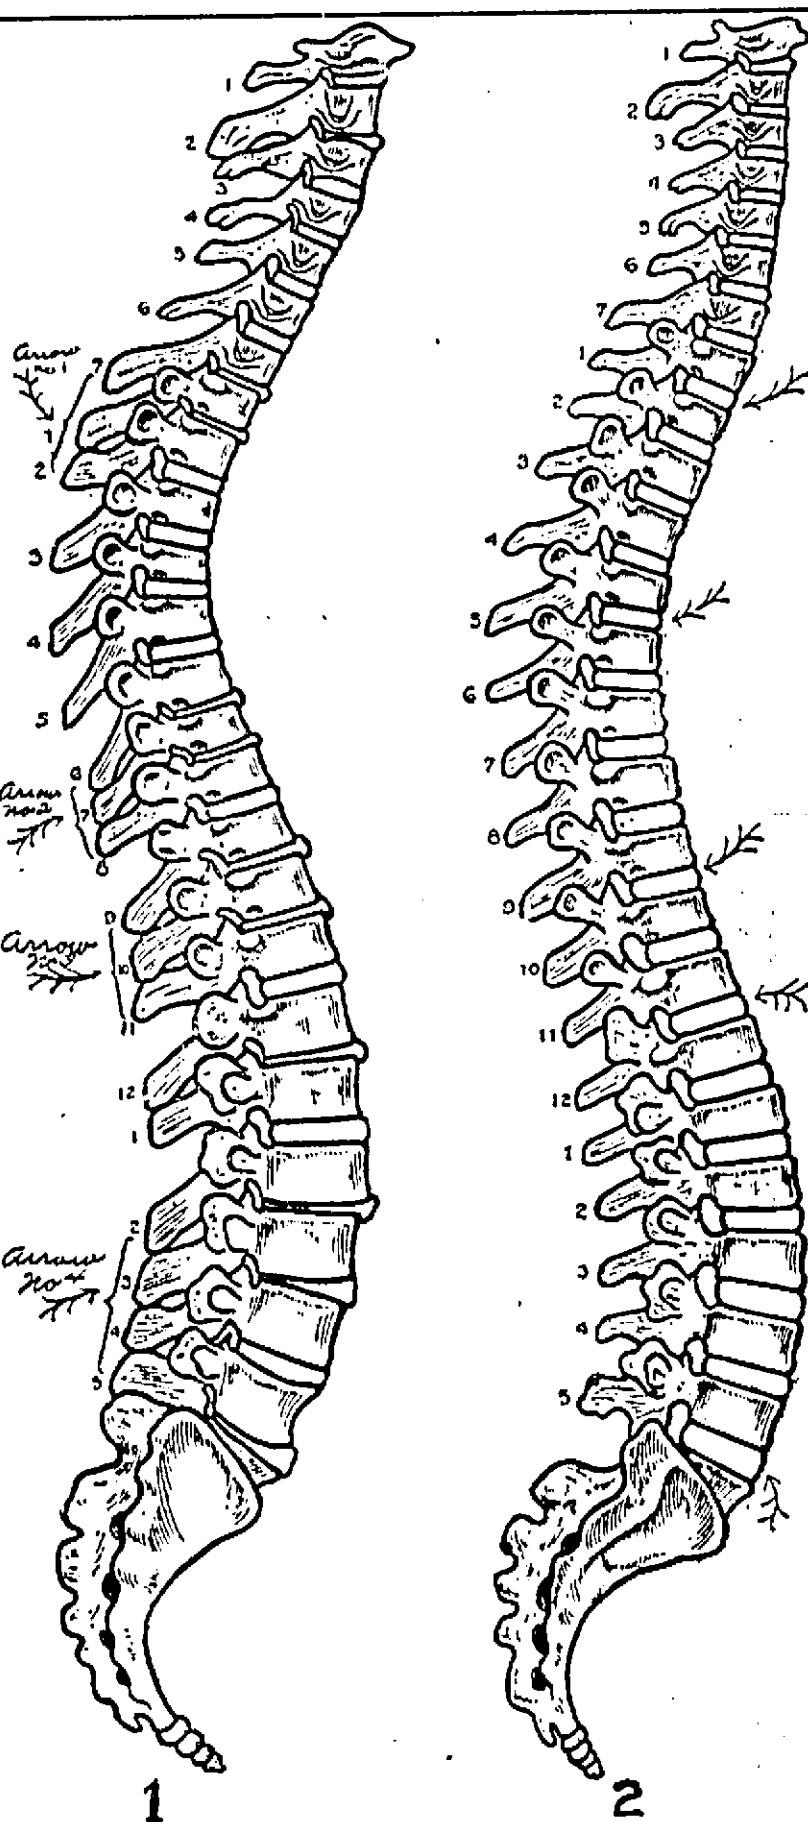

Through an injury the vertebrae in spine No. 1 became subluxated and caused a pinch, an excessive pressure upon the nerves of one side of the vertebrae which ultimately resulted in the soft, cartilaginous cushions between the vertebrae, losing their natural form—they became wedged-shaped, thinner at one edge than the other, as is shown in the chart.

But the most serious results from the tilting of the vertebrae follow from the pinching of the nerves that pass through, and are protected by the long processes on both sides of the vertebrae. The slightest subluxation of a vertebra throws the process against a nerve and, instead of protecting it from injury it becomes a source of pain, disease and disorders that will last just as long as the cause exists.

In spinal column No. 2 note the openings between each vertebrae. Here they are parallel, normal, right. The thickness of the cartilage is the same in every direction; the vertebrae are held in their correct position and the nerves pass through them to the various organs of the body without impediment, without pressure or interference. No. 2 depicts the healthy, normal, natural spine. If your spine is as shown in No. 2 you will have no trouble with your stomach, no liver or kidney trouble; no appendicitis, no lame back. You will not have sciatica, no inflammatory rheumatism. You will never be troubled with headaches, you will not be threatened with paralysis or apoplexy. You will not feel old and stiff. Operations will be few and far between—your health will be perfect; you will die of a good old age.

You should keep your spine as shown in No. 2 and the only way to do this is to go to a man who knows how to properly locate and adjust a subluxated spine. Only skilled Chiropractors can properly locate your trouble, for the pressure on the nerve may be at one spot and the manifestation of the abnormal condition—the disease—far removed from that point.

Pain is the manifestation of approaching disease and by a scientific Chiropractic Adjustment pain will leave the body at once and then disease can not develop.

Normal Spine

CHART NO. 2.
This illustrates a perfect spine and any person having a spinal column like this could not possibly be sick, neither in that form could they get into a condition that would bring illness upon them if they desired to. You will notice all of the different Vertebrae the entire length of the spine and you will not find a subluxation. You will also notice that the Cartilage between each of the Vertebrae, the arrows point to a few only, are in a normal condition and stand up in full shape.

Note the accompanying illustration the openings are between each and every vertebrae (segments of spine). Through these openings the spinal nerves pass after they branch off from the great spinal cord. Every bone in the spinal column moves some more freely than others. Falling, jumping, being hit in the back when not expecting the blow will cause these bony segments or vertebrae to subluxate or get out of their natural positions. In such cases the vertebrae are thrown together, thereby making the openings between the vertebrae smaller and pinching the nerves passing between the subluxated bones, to a third or quarter its normal size.

Do You Wonder that the Part of You Supplied by that Nerve Gets Out of Order?

Note arrows 1, 2, 3, 4, in picture No. 1, pointing to subluxations of the dorsal and lumbar vertebrae and showing how the openings between the vertebrae are diminished in size, and how the nerves would be pinched in the same condition in a human being.

100% of life current starts at the brain, en route for the kidneys, passing down the spinal cord to the kidney nerves between vertebrae 9, 10, 11 in picture No. 1. There being obstruction at this point on account of spinal subluxations the nerves are pinched to about one-half their normal size. On account of the pinching of this nerve the kidneys, instead of receiving the normal 100% of current receive only 50%, which only enables them to do 50% of their work and brings about a diseased condition.

Any person with subluxations in the spine at the point mentioned above will have any of the numerous diseases of the kidneys.

The remedy is certain and simple—remove that deadly pressure by bringing back the vertebra to its natural position. This is what the Chiropractors are doing every day. Our easy scientific method removes the cause for your sickness or disability and nature does the rest. This is a fact proved in hundreds of cases of kidney trouble, heart diseases, rheumatism, indigestion and other serious ills.

We can readily show you just how spinal nerves are pinched and just as readily remove the pressure. Then the invigorating power of normal nerve supply will restore Health and Strength in abundance and give you back the joy of living. Call at our office today; let's talk it over and get at the Root of your trouble.

Hundreds of persons enthuse over Chiropractic; tell their friends; discuss it whenever they have the opportunity. Here are some instances of quotations that were overheard in our office and which we recorded.

CONSULTATION AND EXAMINATION A RE FREE. SEND FOR OUR FREE BOOKLET ON CHIROPRACTIC

1. "If you are doing for others what you are doing for me the science of Chiropractic is truly wonderful."
2. "Six adjustments and entirely rid of asthma of twenty years' standing."
3. "Wish I had known of Chiropractic 11 years ago it would have saved me considerable time and money, as I've been compelled to leave home every year for relief."
4. A lady of 54 says: "I feel like a girl of 16 after a course of your Chiropractic adjustments."
5. "All run down; built up in three weeks."
6. "Reduced my weight in a short time."
7. "Was troubled a great deal with gas on the stomach and bowels, also headaches and nervousness; after taking the adjustments am well."
8. "After what few adjustments I've received the tumor in my right side is getting smaller."
9. "I cannot find words to express my feelings for the good the Chiropractors have done for me."
10. "For seven weeks I suffered with severe pain in my back and abdomen. After the first adjustment the severe pain left me."
11. "When I called on you I wasn't able to do work of any kind, now I work every day and feel O. K."
12. "Can recommend your adjustments to every one to be all right."
13. "It gives me great pleasure to say to the sick and suffering of Rock county that after six adjustments I'm a well woman."
14. "Having had piles for a long time took five adjustments one year ago and have not had the slightest trouble since."
15. "My double rupture of several years standing is absolutely well."
16. "The adjustments have done wonders for me, both mentally and physically."
17. "My catarrh and kidney trouble of long standing is entirely gone."
18. "The pains I suffered in my arm for six weeks, for which I had taken electrical treatments and received no benefit, left me after three Chiropractic adjustments."
19. "Large goitre removed by taking a few Chiropractic adjustments."
20. "Could not turn my head for 15 years on account of stiffness. In my neck due from a fall from a sleigh in a runaway. Two adjustments and my neck is as limber as it was 20 years ago."
21. "I wouldn't take \$2,000 for what you've done for my stomach and bowels."
22. "Can sleep just fine since the adjustments."
23. "Bronchial asthma is a thing of the past."
24. "My little boy's eczema has left his face."
25. "The mimic spasms from which I suffered am glad to say are completely gone."
26. "The adjustment did not hurt me a particle. I was led to believe they would by skeptics."
27. "Chiropractic is the greatest science of the twentieth century."
28. "Dollars for adjustments, but not one cent for medicine."
29. "My left leg, before taking adjustments, was about three inches shorter than the right. They are about equal in length now and I've only had seven adjustments."
30. "You can't imagine how my memory has improved."
31. "I wouldn't take \$10,000 and suffer as I did before taking adjustments."

THE FERNBANK DAM
THE BIGGEST MOVABLE WICKET DAM IN THE WORLD OPEN FOR NAVIGATION THE OHIO RIVER.

Fernbank, Ohio.—When Alice Roosevelt Longworth, wife of Congressman Longworth, breaks a bottle of wine over the rushing waters at the new government dam at Fernbank, Ohio, Sept. 14th, it will mark the formal opening of the biggest movable wicket dam in the world, and the only one made entirely of concrete and steel.

Representative bodies of people from the entire Ohio Valley will be there to see the dedication of the big dam. All coming from Pittsburgh to Cairo, Ill., will be represented by its prominent business men and Colonel Roosevelt will make the opening address in commemoration of the work he started years ago to make the Ohio river navigable the year round from Pittsburgh to Cairo, its entire length. That's one reason why Mrs. Alice Roosevelt Longworth will break the bottle of wine over the dam, and the other reason because it was her grandfather who brought the first passenger steambot down the Ohio river from Pittsburgh back in the early eighties.

Fernbank dam, known officially as No. 37, given Cincinnati and vicinity for 25 miles around a permanent navigable harbor of nine feet of water the year round and it is a step completed in the big work going on to make the entire Ohio river navigable the entire year.

Fifty thousand people from towns and cities along the Ohio river will crowd into Cincinnati on Sept. 20th to 24th for the big dedication exercises which will cost \$30,000.

THEODORE ROOSEVELT MRS. LONGWORTH

Pursued by an Apparition.
That burglars have a keen sense of humor has often been demonstrated, and a merry thief turned up at Chicago the other day who, running unexpectedly into a policeman, explained that he was fleeing from an apparition, and was looking for police protection. The apparition in question turned out to be a night-shirted householder whose home the fugitive had just robbed!

Plantain a Tropical Blessing.
The plantain is a native of the tropics which helps to keep man's laziest filled. The plantain is credited with having grown in the Garden of Eden alongside the tree from which Eve picked the apple. Its fruit is used much as are bananas and its "cabbage" is esteemed a great delicacy.

Want Ads bring results.

Inundation of the Nile.
The valley of the Nile is inundated regularly every year from the 15th of June to the 15th of September. When the river subsides it leaves a rich deposit of soil for six miles on each side of the stream. Sometimes the overflow is excessive, but if the inundation falls short failure of crops results. In 1829 the flood was so great as to cause the loss of 30,000 lives and the destruction of much property.

A Little Mound.
By the side of a little sandy mound stands a man, old, stoop-shouldered, awed with snowy locks. No sound disturbs the evening's quietness save the cooing of a mourning dove. But suddenly a flat clenches and the aforementioned man is heard to exclaim: "Confound that woodchuck!"—Judge.

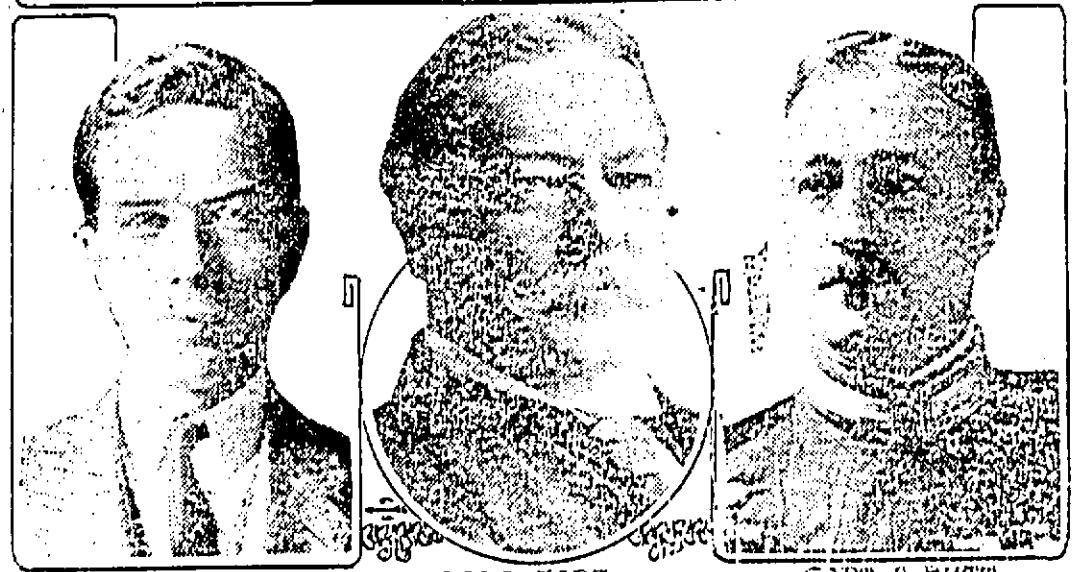

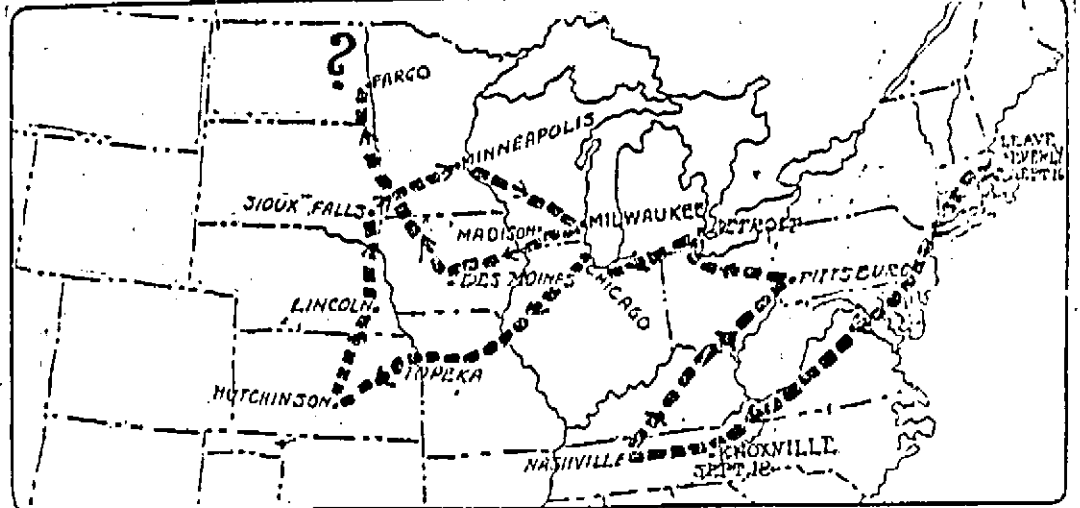

CHICAGO SUBWAY ASSURED.
John Ericson, city engineer, who is to have charge of the Chicago subway system that will equal if not surpass any subway service in the world.

Chicago, Ill.—Plans for the Chicago subway, which will equal or surpass anything in the way of subway service in the world are progressing rapidly. John Ericson, city engineer, is to have charge of the work and on the city's commission with him were appointed E. C. Shookland and James J. Reynolds.

As soon as the subway is completed there will in all probability no longer be a Chicago loop disabled by the elevated road as local authorities claim that the elevated road in Chicago's downtown district is trespassing and can be put off the streets at any time.

The subway is to be the full width of the Chicago streets but will not extend under the building foundations. Each of the commissioners appointed are to receive a salary of \$12,000 a year.

C. D. NORTON PRES. TAFT. CAPT. A. B. SMITH.

PRESIDENT TAFT TO OPEN 1912 CAMPAIGN WITH TRIP THROUGH MANY STATES.
Washington, D. C.—Leaving Monday, Sept. 18th, according to his present plans, President Taft is to start a trip, which will open the 1912 campaign. The itinerary is to include stops in Tenn., Penn., Ohio, Michigan, Indiana, Illinois, Missouri, Kansas, Nebraska, South Dakota, Minnesota, Wisconsin, Iowa, North Dakota, and will probably extend to the coast, should the President at that time find that conditions warrant this extension.

Few definite dates have been arranged though the general scheme of the trip is pretty well in mind. He will be in Knoxville on September 18th, where he will open the Appalachian Exposition. From there he goes to Pittsburgh to attend the Steamboat Convention. The next definite date is in Hutchinson, Kansas, though he will make several stops between Pittsburgh and Kansas, including Ohio, Michigan, and Kansas.

Read the Ads and get acquainted with the live merchants.

Friendly Discussions Avail.
It would be an important step towards the reconciliation of political opponents if they would clearly airily on what points they agree, and what points they differ. To this end, friendly discussions avail more, far more, than calumnious insinuations, furious invectives, the acerbities of partisan rivalry, the machinations of intrigue and malice. —Comte de Mirabeau.

Successful Men Not Fussy.
Peace and happiness cannot exist in the vicinity of an individual who has a mania for settling everybody right. He is generally unfitted for office, being one of the exasperating people who are continually saying what they would do while really doing nothing at all. It is usually the sluggish or fussy, who stands about and watches others work, who can sing at a dozen ways in which they can do better.

Is daily consumed in Southern Wisconsin

AGRICULTURAL SCHOOL PLANS TO GIVE AID IN DRAINING SWAMPS

Has Published a Bulletin in Which They Give Instructions For the Drainage of Swamp Lands—Will Increase Yield.

To make twelve sacks of oats grow where six formerly did and to make marshes, formerly thought of no value, to blossom with farm crops, is the subject matter of a bulletin prepared by Prof. E. H. Jones and issued by the Wisconsin Agricultural Station. The bulletin is of much practical value to land owners of Wisconsin.

It is pointed out by the author, that in the state of Wisconsin alone there are over 2,000,000 acres of marsh land, at present merely utilized for hay or pasture or as duck blinds. This land, at present of no practical value, may by careful drainage be made into the best of farm land. Such land, now worth but a few dollars an acre, by draining becomes the most valuable and high priced land.

The benefits of drainage have been fully demonstrated in many sections of Wisconsin. Tracts of land of every imaginable character have thus been drained and have been made to yield large crops. In this day when land is worth almost fabulous prices the economy of draining, as proposed, is apparent. Farm land in Wisconsin anywhere near a railroad will bring at least \$100 per acre and to drain the 2,000,000 acres of marsh land in the state means to add many millions of dollars to the wealth of the state.

Disadvantage of Water

Too much water in the soil has five drawbacks as pointed out by the bulletin: First, it is too soft to cultivate; second, spring water must be delayed till mid-summer and then only half a crop be realized from the ground; third, wet soils are cold. Only certain crops can be raised on a very damp soil thus decreasing the possible output of the land. Fourth, air is kept out of the ground in a great many cases. If the air is kept out of the ground there can be no plant growth of any consequence. The water remains in stagnant pools and the decay of vegetable matter checked. In the fifth place, too much water prevents healthy crop growth. This is apparent to every one. The mud holes in a corn field are always productive of the small yellow stalks of little value to the farmer.

To counteract these five evils as presented by the author, four types of drainage are proposed, which any farmer may himself install at little expense. These are enumerated as: (1) protection ditches to prevent the entrance of excessive water; (2) outlet ditches where there are no valleys or ravines; (3) surface ditches where the land is too flat for the water to flow away and (4) covered under drains to remove surplus water from the sub soil.

As compared with the resultant value of the land the expense of drainage in any instance is comparatively trivial. Open ditches cost from ten to fifteen cents per cubic yard of excavation. Any marsh may be provided with the three types of drains for \$10 or less. Four inch tile may be laid three feet deep at a cost of about 25 cents per rod.

Aid in Reclamation

Prof. Jones and his assistants aid in the organization of drainage districts and in the reclamation of swamp lands. Plans and specifications for drainage projects are also furnished to those desiring them. For the purpose of demonstrating the value of drainage in districts where it is little practiced members of the department often give their time and assistance.

BIRTHDAY SURPRISE FOR LITTLE MISS ADELIA WARD

Sixteen friends of little Miss Adelia Ward surprised her at the home of her parents, Mr. and Mrs. C. E. Ward, 539 Caroline St. It was the occasion of her thirteenth birthday and a number of pretty gifts were received by the little hostess. Games were played and a delightful time was enjoyed.

THE 'DEPOSED' AUTOCRAT OF YALE ROWING.

John A. Kennedy, who has been let out of his position as coach of the Yale crew.

Portland, Maine, Aug. 18.—John A. Kennedy, the old captain and Yale coach, who has just been notified that his services will no longer be needed and that he may be succeeded by "Babe" Cook, when seen at his summer cottage at Torrington Point said: "I cannot discuss the Yale matter at this time. I am too good a Yale man to do that. I can only say that I am eager for the success of the Yale crew in the future. I am not of the type to speak of my correspondence with any parties."

When asked regarding certain charges, he replied: "I was never in Yale rowing. I wish I had been."

CHURCHES

St. Mary's Catholic.

St. Peter's Ev. Lutheran church, corner Jackson and Center streets. Rev. O. E. Hoffmeister, pastor. Sunday school, 9:45; services, 11:00. No evening services.

Norwegian Lutheran.
Norwegian Lutheran church, cor. W. Bluff and Madison St. W. A. Johnson, pastor. English services in the morning at 10:30; Norwegian services in the evening at 7:30. All are cordially invited.

Christian Science Church.
First Church of Christ, Scientists, holds services in Phoenix block, West Milwaukee street, Sunday morning at 10:30 and Wednesday evening at 7:45. The subject of the Lesson-Sermon Sunday morning will be "Mind." Sunday school meets at 12:00 o'clock. Reading room open daily, except Sundays and holidays, from 2 to 4 p. m.

General Text.
Corner of Goodfield and Vista Avenues. Preacher Evangelist H. H. Simpson, assisted by C. Howard. Special services Sunday at 3:00 and 7:30 p. m. The directors of this mission have decided not to hold service on Sunday morning, as they are desirous to avoid clashing with any of the regular church services in the city. Crowds are expected as this is the last Sunday of the mission in this neighborhood. Come in and spend an hour with us, you'll enjoy the hearty singing and gospel truth.

Salvation Army.
Salvation Army, 18 S. Main street. Sunday meeting, 11 a. m. Sunday school, 2 p. m. Young People's, 6:30 p. m. Salvation, 8:00 p. m. Week night meetings Tuesday, holders 7:30 p. m. Wednesday, public, 8:00 p. m. Thursday, public, 8:00 p. m. Friday, cottage prayer, 8:00 p. m. Saturday open air only 8:00 p. m. Milwaukee and River street. Good singing and speaking and a welcome to all will be found at the Salvation Army. Captain and Mrs. Ellis, officers in charge.

United Brethren.
Church of the United Brethren in Christ. Corner Milton and Prospect Avenues. L. A. McIntyre, Pastor. Bible school 10:00 a. m. Preaching service 11 a. m. subject, "Romans." Chapters 8 and 9. One of a series of sermons in the book. In the evening at 7:30 we begin a series of illustrated sermons on Tinsot's "Life of Christ." Come and get the best conception possible. Get the medium of the eye as well as the ear of the life of our Lord. Tinsot's pictures are the best. All are welcome.

Trinity Church.
Morning prayer, litany and sermon, 10:30 A. M. conducted by Mr. George Francis of Madison.

W. C. T. U. HELD ANNUAL MEETINGS ON WEDNESDAY

Officers Were Elected For the Coming Year and Reports of Retiring Officers Were Heard.

Officers for the coming year were elected by the W. C. T. U. Wednesday afternoon at their annual meeting in their hall. Reports of the various officers and superintendents were read and showed that the society had done much work during the past year. The dates for the Rock county convention, which will be held in this city, were selected as September 12 and 13. The officers elected were:

President—Mrs. A. W. Harwood.
Vice Pres.—Mrs. O. W. Athan.
Corr. Secy.—Mrs. George Jacobs.
Gen. Secy.—Mrs. A. Murphy.
Treasurer—Mrs. Mayhew London.

ORFORDVILLE.

Orfordville, Aug. 19.—Mrs. Ames and daughter of Broadhead, spent part of the week with Mrs. Koller's.

Mrs. G. L. Stivers, Mrs. Chas. Conroy and children of Footville, were callers in the village Thursday.

Misses Anna and Elida Bothem were callers in Janesville Tuesday.

Messrs. T. O. Rime, Orin Rime and H. P. Silverthorn were callers in Beloit Wednesday.

Miss Hazel Osgard of Stoughton, is spending a few days at Elmer Holden's.

G. O. Roen of Janesville, was a caller in the village Wednesday.

Mr. and Mrs. Alex Wiegand spent Wednesday and Thursday in Janesville.

S. O. Osgard was a caller in Janesville Thursday.

Miss Ora Knutrud spent Wednesday night at Broadhead.

Nels Osgard was a Janesville caller Wednesday afternoon.

De Wells spent Thursday afternoon in Janesville.

Harry Langdon and Erwin Silverthorn of Footville, were callers in the village Friday.

Orin Rime of Edgerton, is spending a couple of weeks in the village.

Nels Osgard and Elmer Grenawalt spent Friday at New Glarus.

Ray Buck of Footville was a caller in the village Friday.

Alie Peterson was a caller in Janesville Thursday evening.

HAVE COMPLETED THE WORK FOR BASEMENT OF BOTTLING PLANT

Hawatha Water Company Will Construct Several Buildings This Summer.

Contractor Hayes of Minneapolis, with a good sized force of masons and contractors are hard at work rushing the construction of the bottling house for the Hawatha Water Company at their property, formerly known as Burr Springs. The cement basement for the main building to be built this summer, 115 feet long by 30 feet wide is already in and the laying of the white Portland cement has begun. The brick is being unloaded at Grundy's crossing and hauled overland to the site of the building, while much of the timber has been unloaded at the old Thoroughgood docks and hauled up the river by a steamer.

The work is being rushed and Contractor Hayes expects to have the buildings finished and ready for occupancy by November 1. Aside from the main bottling plant there will be two smaller store houses constructed for storage of the bottles and packing the bottling plant proper. The buildings will be white Portland cement, with bedford stone trimmings and concrete floors. They will be equipped with the latest machinery for bottling and will have a capacity of thirty thousand bottles a day.

The water will be brought to the city by a large large hauled by a tug, the large and tug being in process of construction. It will be shipped directly to the consumer. Headquarters having been secured in Chicago and New York. In the past years the water has been sent to all parts of the globe and it is expected that with the better facilities for bottling this trade will again be taken up.

The company is capitalized for a million dollars, the stock being owned by Minneapolis and New York men. Louis S. Park, of Minneapolis, is the moving spirit in the company, and has been in Janesville for some weeks arranging for the details of the construction.

EVANSVILLE.

Evansville, Aug. 18.—Mrs. Everett Van Patten and daughter, Miss Lulu, entertained about twenty-five ladies yesterday afternoon. The afternoon was spent with five hundred, after which a dainty luncheon was served.

Mr. and Mrs. Kiehl Shaw are spending a two weeks vacation with relatives in Mandelst, S. Dakota.

Miss Gladys row of Chicago, is expected here tomorrow for a week's visit at the home of Frank Crow.

About forty of City Road Neighbors enjoyed a picnic Wednesday at the farm home of Mr. and Mrs. Clyde Courlier.

Mr. and Mrs. Wm. Schneider and their guest Miss Emma Eberly of Portage will spend Saturday and Sunday with the Chicago friends.

The Misses Hazel and Cella Keylock expect to leave Monday for a week's visit in Toledo, Iowa.

Mr. and Mrs. Harry Turner of Long Point, Ill. are guests of Evansville relatives.

Mrs. Fred Bloodgood and little son of Whitewater, are visiting at the home of Miss Letia Acheson. Mr. Bloodgood will arrive tomorrow to remain over Sunday.

Mrs. E. M. Fairbanks is spending a few days with Miss Alice Pearson.

Mr. and Mrs. Warner of Chicago, are guests of Bert Dunn and family.

J. R. (Rubeck) has moved into the home he recently purchased of Mrs. Charles Robinson on Lincoln street.

Doris, the little daughter of Mr. and Mrs. Chas. Copeland has been sick for the past few days at the home of her grandmother, Mrs. Sargent.

Mr. and Mrs. Morgan of Albany, have been visiting Mr. and Mrs. E. an Putten for a short time.

Rev. D. Q. Grubbs is expected home today from a visit to relatives in New York.

SELLS LOS ANGELES HOME TO CATHOLIC INSTITUTION

J. A. Cunningham, formerly a resident of Janesville, father of Herbert Cunningham, has sold his residence in Highland Park, Los Angeles, to the Catholic college there. The institution has purchased the residence on one side of their block and will use them as homes for the priests.

PIMPLES ON FACE CAUSED GREAT DISFIGUREMENT

For Three Long Years, Suffered Great Deal, Cuticura Soap and Ointment Brought Marvelous Results. In Few Weeks Cured Completely.

"I was troubled with acne for three long years. My face was the only part affected, but it caused great disfigurement, also suffering and loss of sleep. At first there appeared red, hard pimples which later contained white matter. I suffered a great deal caused by the itching. I was in a state of nervousness when nothing would do but something had to be tried. I used Cuticura Soap and ointment. I sent for a Cuticura Booklet which I read carefully. Then I bought some Cuticura Soap and ointment and by following the directions I was relieved in a few days. I can truthfully say that the Cuticura Remedies are not only all, but more than the claim to be." (Signed) G. Baumer, 1915 W. 22nd Place, Chicago, Ill., May 28, 1911.

For more than a generation Cuticura Remedies have afforded the most recommended treatment for affections of the skin and scalp. A cake of Cuticura Soap (25c) and a box of Cuticura Ointment (50c) are often sufficient. Although sold throughout the world, several samples of each, with 25c. back on the skin will be sent free, on application to Potter Drug & Chem. Corp., Dept. 233, Boston.

NOTES FOR CITY FARMERS ONLY.

(By H. L. RANN.)

We are asked if there is any cure for the double chin in male pigs. The best remedy we have found is to clamp the pig in a vise and massage the Adam's apple forward in sight. The double-chinned pig is galling as common as preacher's children at a circus, and it is time something was done to discourage his propagation.

Some colts have a very disagreeable speaking voice, and their conversation sounds a good deal like the dulcet strains from a plugged harmonica. We had a colt once which used to call its mother to labor and refreshment with a falsetto high "C" which would shatter the ear drums of a deaf mute, and we finally had to remove a section of his epiglottis with a corn razor.

THE FAMOUS STATESMAN BECOMES A PUBLISHER.

A colt which has a whinny like the trouble of a saw mill ought to be belted up to a screen and allowed to sing a duet with the fire bell.

It is a big mistake to build the manger so high that a horse has to stand on his thighs to reach the feed box. A friend of mine let the contractor for a new stable to a cross-eyed carpenter, and when he got through the owner had to jack up his horses in a bed blanket. He forgot to do this one day, and a broadside caught her galloping on the top rail and slowly strangled away to everlasting bliss. A high manger will soon make a short-necked gelding look like a near-sighted man at a hospital-kitchen show.

The original champ is the farmer who tries to get milk from a half-starved cow. The man who has an idea that he can fatten a heifer on a plot of ground feed twice a week will draw the largest lemon in the creamery company's prize distribution. We remember a farmer who was so tight that he couldn't yawn without making his face crackle like a bonfire, and he figured that a milk cow ought to get fat on the east wind. The result was that his cattle looked as if they had been fed through a laundry mangle. Your milk check will resemble a popular subscription for the Home for the Aged before you put meat on a hungry heifer with love, attention and other valuable considerations.

SESSION LAWS.

A limited supply of laws for the session of the legislature just closed is at the Gazette office and those desiring a copy in newspaper form may have one by calling.

MYSTIC WORKERS TO HOLD PICNIC AT YOST'S PARK

Local Lodge Planning to Hold Outing at Park Down the River Next Sunday.

Next Sunday the Mystic Workers Lodge of this city will hold a picnic at Yost's Park. Part of the number who will attend the picnic will leave here in the morning on the ten o'clock car on the interurban and the remainder will depart for the park early in the afternoon. A fine program of sports has been arranged for the day and a ball game will probably be one of the features of the outing.

ROSTAND RECOVERING FROM AUTO WRECK INJURY.

Edmund Rostand, the poet and dramatist, author of "Cyrano de Bergerac" and "Chantecler" was recently seriously injured in an automobile accident and is slowly recovering. The accident occurred while he was motoring from Cambridge-Stable to St. Jean de Luz, accompanied by his chauffeur and a mechanic, when the car skidded on a curve in the road and turned turtle. While Rostand is suffering seriously, it is the belief of his physicians that he will soon be able to leave his villa at Cambridge-Stable.

THE FAMOUS STATESMAN BECOMES A PUBLISHER.

David R. Francis, now controlling owner of the St. Louis Republic.

St. Louis, Mo.—The St. Louis Republic, the oldest democratic newspaper in the city and one of the pioneer papers of the middle west, has passed into the control of David R. Francis, ex-governor of Missouri. Mr. Francis has long been a large stockholder and now succeeds in the command of the paper, Charles W. Knapp. Mr. Francis has had an international career which has stamped him as one of the leaders in the democratic party. As a member of Grover Cleveland's cabinet, he won international fame and when as president of the St. Louis world's fair, handled an international proposition with the utmost business skill. He was elected governor of Missouri and has since been a candidate for the United States senate.

Hay Fever, Asthma and Summer Colds

Must be relieved quickly and Foley's Honey and Tar Compound will do it. E. M. Stewart, 1014 Wolfram St., Chicago, writes: "I have been greatly troubled during the hot summer months with Hay Fever and find that by using Foley's Honey and Tar Compound I get great relief." Many others who suffer similarly will be glad to benefit by Mr. Stewart's experience. Foley's Honey and Tar Compound is effective for coughs and colds in either children or grown persons. No opiates, no harmful drugs. In a yellow package. Refuse substitutes. Badger Drug Co.

WOMAN'S PAGE

Thought for Today
By MRS. ROBERT M. LAFOLLETTE

A HIGHER STANDARD OF HEALTH.
MOST of us are anxious to keep well—although some are satisfied to "keep about the same." But when we reflect how many women are ill, how serious the consequences of so much illness to home and society, we realize that all of us women—for ourselves, for our children, for the race—should strive for a higher standard of health.

There are two phases of the health problem, protection from without—quarantine, sanitation, and all effort to eradicate disease; protection from within—strength and vitality that give immunity and resisting power. Women through their organized effort are doing most effective work for public health. But are we tackling the individual problem with like determination?

If we are too stout or too thin, our complexion bad, the neck sagging, we are eager to try corrective gymnastics, as we would be a patent medicine specific, a few doses of which will cure our ailment. But if the physician prescribes walking in the open air a while each day, we may say, "It tires me to walk," and think that settles it.

It is remarkable how a little systematic exercise strengthens and fortifies the body and prepares it to endure unusual strain. If each day we make sure to fully expand the lungs, thoroughly stretch the muscles and walk briskly in the open air—perhaps run a little to start the circulation—it need not take any more time than we spend at a bargain counter, deciding which of two articles we do not need, we will buy because it is cheap—but Oh, what a saving of nervous energy and what a difference in constitutional invigoration.

The Evening Chit-Chat

By RUTH CAMERON.

AN UNSCRUPULOUS magazine publisher has recently cheated me out of the pay for many months' faithful work. He has taken advantage of the fact that I am a woman and too far away to attend to the matter in person, to completely ignore all my written requests and demands for payment.

He is my first experience of a dishonest business man, and a bitter one. I can't think of my transactions with him without being overwhelmed by a perfect fury at the injustice I suffered.

I was saying as much to another big business man the other day. "I'm saying as much to another big business man the other day," he said. "It's foolish."

"Haven't I reason to?" I demanded. "Yes," he admitted; "but more reason not to." "Don't you see," he went on, "you are letting him do more harm than he has already done you. Every time you get in that fury you are letting him steal your peace of mind as well as your money. Fretting over anything like that I call 'futile piffle,' to quote Stalky. I'll tell you my rule about all such matters, Miss Cameron, and you can see for yourself if it isn't a good one: 'Never use up energy in a way in which you get no return.'"

I most emphatically think it is a good rule. Don't you?

Not only about getting angry uselessly, but about many other things which are just as much "futile piffle."

Perpetually fretting because one cannot have as much as one's neighbor, for one instance.

Perpetually worrying about the future, for another.

Getting all worked up because someone else will not see things or do things the way you do yourself, for another.

I know a woman who can never see a certain child of her neighbor who, being named for his father, is usually called "Junior," without saying fretfully, "I don't see why they will call that child 'Junior.' I think it's a shame not to call him by his own name."

These are all the instances of wasted energy that I can think of just now, but doubtless you can supply others from your own outlook on life.

Doubtless we could all find ourselves doing and thinking, and saying a dozen things every day that would give us reason to reprove ourselves and remind ourselves not "to use up energy in a way in which you get no return."

The Candid Girl

by Barbara Boyd

Tells Some Qualities an Employer Would Like to Find in an Employee.

IF I were an employer," said the Candid Girl, "seems to me I would call each new employee into my office, and tell her in plain language some of the things I expected of her."

"It wouldn't do any good," said the Business Man. "You'd only be wasting your time. You'd better be turning it into money to offset her delinquencies."

"But wouldn't it be worth while," inquired the Candid Girl, sweetly, "to tell her for instance, that the office was neither a manicure parlor nor a hairdresser's, and that I would like her to complete her toilet at home?"

"Not a bit," said the Business Man. "She would simply think you mean and horrid."

"Nor wouldn't it do any good for me to mention that the telephone wasn't a private wire put in for her especial benefit?"

"Not a bit. If you did, she'd hang up the receiver with such a bang every time you asked her to answer it for you, that you'd probably get a call down from the chief operator."

The Candid Girl sighed. "Nevertheless, it seems to me, I would like to tell her, when she was always late in the morning and made a lot of mistakes and said I was because her mother was sick and she was worried, that, of course, I was sorry her mother was sick, but that the office was not an ephemerical institution to provide funds for sick mothers; and that she had better either get some one to take care of her sick mother, so that she could do her own work properly, or else stop making a bluff at it, and stay home and look after her mother."

"She'd only think you a heartless brute," said the Business Man, wearily.

The Candid Girl looked pensive. "It's queer, isn't it, how they get things muddled." After a few minutes, she went on, "And I would like to suggest that she take some memory training, so that whenever I asked her if she had attended to certain important matters I had told her about, she wouldn't exclaim with a start, 'Oh, I forgot!'"

"Not use," said the man, "She seems to think it a sufficient excuse that she's sorry."

"Wouldn't it be of any value to hint, that if she would go to bed a little earlier, she wouldn't be all fagged out in the morning?"

"You'd be taking personal liberties."

"Nor to give a little plain talk about wasting supplies? If, for instance, I pointed out," said the Candid Girl thoughtfully, "that it would mean a big decrease in the running expenses of the business, if she and the others would be careful about the stationery, and not use any more wrapping paper and string than was needed, or would get more than a dozen words to a page in their shorthand notebooks, and a few things like that, wouldn't it have any effect?"

"You'd be stingy."

The Candid Girl sighed. "If there was only some way to give employees the employer's point of view for a little while! If they could be induced to look with his eyes at these matters, maybe the employer's lot would be a happier one."

Barbara Boyd

TALK TO HOUSE-KEEPERS

(By Nellie L. Horn.)

"My Lord, I hope you are pepper-proof."

—SWIFT

The season for making pickles and condiments is rapidly approaching

and it behooves every good housewife to be planning her winter supply. To be sure it is now possible to obtain very excellent qualities in store goods, but no one can deny the superiority of the home-made over the manufactured article. Besides, there is a noticeable saving in the cost, as well as an indescribable satisfaction in the preparation of these relishes at home. The Saturday home will be doubly delighted if served with Catsup or Chili

Sauce, while condiments of some kind are practically indispensable with game, fish and cold meat.

Some of the difficulties which face many housekeepers in making Catsup are the finding of suitable containers, and the filling and sealing of the same. Because he of the "57 varieties" puts his in tall, small-necked bottles with the cork rammed in almost irremovably, most of us think that is the only safe and proper method of bottling; while, in reality, any good relish can, preferably of the pint size, will answer perfectly, dispensing with half the bother of canning. It will keep for years in this way, and even an opened can will keep for weeks.

When following the recipe, it should be borne in mind that the measurements of all spices, salt and pepper are level, and it is well to make them scant sooner than otherwise, or you will certainly need to be "pepper-proof."

This Catsup recipe has been in constant use for about fifty years, and can count its friends and admirers by the thousands. Wash and slice without paring one peck of ripe tomatoes, three four large onions. To these add three-quarters of a cup of salt, two tablespoons of black pepper, one tablespoon of red pepper, one tablespoon of cloves, and one-half tablespoon of cloves (using ground spices). Mix all together and stew until very soft, about a two hour process. Just before taking from the fire add a quart of vinegar. Rub through a colander, put on to boil again, and can when of the proper consistency.

Chili Sauce is more easily made, as it does not require rubbing through a sieve, and calls for but one boiling. It is not as "hot" a relish, and makes a pleasing variety. Pour boiling water on eighteen large ripe tomatoes, slip off the skins, and slice them. Chop finely one green pepper and three onions; add two tablespoons of salt, one-half cup of sugar, two cups of vinegar, and one teaspoon each of ground cloves, nutmeg, cinnamon and allspice. Boil two hours, and can. The green pepper may be omitted.

There is a general feeling that it is almost impossible to can tomatoes successfully at home, though, in truth, they are the most easily canned fruit there is, and as they can be used in such a variety of ways during the winter, it is well to have a supply on hand. The secret of success is in sterilized cans, sufficient cooking and proper sealing. As the seeds are apt to lodge between the cover and the can, letting in air, it is safer to use a can filler in filling the jars, as they prevent this contingency. They sell for five cents, and are a great convenience in all canning. Select ripe sound tomatoes, pour boiling water over them, slip off the skins, and slice into a preserving kettle. Add about a teaspoon of salt to an ordinary kettle full, but do not add water, as there will be plenty of juice. Boil until thoroughly done, can and seal at once. Tomatoes canned by this simple method have been kept for three years.

The secret of success is in sterilized cans, sufficient cooking and proper sealing. As the seeds are apt to lodge between the cover and the can, letting in air, it is safer to use a can filler in filling the jars, as they prevent this contingency. They sell for five cents, and are a great convenience in all canning. Select ripe sound tomatoes, pour boiling water over them, slip off the skins, and slice into a preserving kettle. Add about a teaspoon of salt to an ordinary kettle full, but do not add water, as there will be plenty of juice. Boil until thoroughly done, can and seal at once. Tomatoes canned by this simple method have been kept for three years.

There is a general feeling that it is almost impossible to can tomatoes successfully at home, though, in truth, they are the most easily canned fruit there is, and as they can be used in such a variety of ways during the winter, it is well to have a supply on hand. The secret of success is in sterilized cans, sufficient cooking and proper sealing. DOINGS OF THE VAN LOONS—Oh yes, Father's guests arrived by the return mail.

A FIFTIETH ANNIVERSARY WAR STORY
BY F. A. MITCHELL.

Copyright, 1892, by American Press Association.

"You never come any more but you want to go right away."
"But, sweetheart"—a half dozen kisses for exclamation points—"I only intend being gone a little while."
"If you once start out to follow some body you don't know anything about you'll be gone all day, and then you'll be ordered away, and maybe I'll never see you any more."
Never was a lover more charmed at such evidence of woman's affection, and never had this lover less cause to be charmed at the evidence of his hold upon Laura Fain. Had Captain Fain Hugh seen what Laura Fain saw from the moment she put her arms around him and held his back to the window—Mark and Jakey going down the walk to the gate—he would have exclaimed: "Oh, woman, thy name is perfidy!"

"Oh, woman, thy name is perfidy!" "Oh, woman, thy name is perfidy!" would have responded, "thy name is indeed perfidy, but how glorious thy perfidy!"
"Jakey," said Mark as they passed behind trees that hid them from the house, "I don't like that officer coming to the Fain plantation just at this time. There'll surely be some mention of us, and it is possible he may want to have a look at us. You know, Jakey, we're only poor, modest people, and don't want to be stared at."
"We ain't got our store clothes on, and don't want ter make no acquaintances," Jakey observed solemnly.

Mark had noticed Laura Fain's agitation when she caught sight of the officer at the gate, and knew there was good reason for it. He did not fear that she would betray him intentionally, but that she might be led to do so from her very anxiety to keep his secret.

"The first chance we get, Jakey, we'll take to the woods. We told them we were going to Chattanooga, and if this officer takes it into his aristocratic head to escort us with true southern politeness a part of the way he'll expect to find us on the Chattanooga pike."
"N' twouldn't be perfidy fo' ter git in his way."

They had gone but a trifling distance when they came to a creek flowing in a wayfarer they met told them—through Moccasin gap. The road crossed it by something between a hedge and a culvert. Mark let the way from the road up the creek and began to climb the hills, on which there was sufficient growth of timber to afford concealment.

At last they came to a hut occupied by an old negro.
"Good morning, uncle," said Mark.
"Mornin, sah."

"Here y' seen anything of a colored boy 'bout eighteen years old go by hyar this mornin'?"
"No, sah."
"He's my boy Sam, and I'm a-buntin him. He run away last night. He'll git a hundred of I ketch him."
"I ain't saw him, sah, 'n I tell yo' what, marse'r, if I had saw him I wouldn't inform yo' ob de fac'."

"That's the way with you niggers, when the Yankees turned your heads. But it won't last long. Our boys'll drive 'em so far north pretty soon that your darkeys'll hev to stop runnin away."

"Now don't yo' believe dat so sarten." "Do you really believe the Yankees can whip us?"
"De Lord, he's sent 'em to tote his colored people out o' bondage."

Mark was satisfied with this preliminary examination that he could trust the old man.

"Uncle, I'm no seesh. I'm a Union man. I want to stay with you today and travel tonight. Keep me all day, and I'll go away as soon as it is dark."

"De Lord, I knowed yo' wa'n't no south'n man all de time."

"How?"

"Yo' ain't got de south'n man's way o' talkin. Yo' did hit well enough, but yo' can't fool me."

"Well, will you keep us?"

"Reckon I will."

"What's your name?"

"Randolph's my name, sah. Jefferson Randolph. My marse'r's name's de 25th me

"Oh, now, see hyar! We can't stop every five minutes to please a guard. How do you know but we're on army business?"

"Well, pull in hyar and show your papers."

Meanwhile the ferryman was keeping the oars moving gently, and the boat turned at an angle with the current, which was taking the boat toward the east shore. "Now pull away hearty," whispered Mark, and the boat shot out of sight of the picket in a twinkling. A bullet whistled over their heads, but wide of the mark.

"Golly!" exclaimed Jakey. "What a party time it shags!"

They were now off Moccasin point, and Mark began to look for a landing place. Just above he noticed a campfire, and above this was a place where the bank was low, with overhanging

"Who goes thar?"

Mark directed the ferryman to pull for these trees. He slipped a handkerchief in one of the rowlocks—the only one used in turning the boat into shore—so as to muffle the oar. The coast seemed to be clear for a landing, but as they drew near they proceeded cautiously and listened for the slightest sound. The boat's nose touched without noise.

Mark handed the wild whiskered ferryman the crisp ten dollar note, which he clutched eagerly.

"Yer purty well ter do, stranger, consider yer close."

"Didn't y' hyar what I said to the guard 'bout business for the army?"

"Yas."

"Want, don't say nothin' 'bout it. 'Til Confederate service pay ez it goes."

The ferryman cared little whom he pulled if he could make ten dollars in one night, and dipping his oars in the water rowed away from the shore.

Mark turned to look about him. His first move was to get under the trees. From there he proceeded inland for a short distance, looking for something.

"Ah, here it is!" he said presently. "Now I know where I am."

He had struck the Nashville and Chattanooga railroad, which runs close to the river bank for about a mile near where he landed. To know he was about two miles from the town.

"Now, Jakey," he said, "we'll bide time right here. As soon as it is light we must set out. Are you sleepy?"

"Am I? Reckon I am!"

CHAPTER V.

THE CAMPS AT CHATTANOOGA.

AT the first sign of dawn Mark awakened his companion, who was sleeping so soundly that it required a good shake to rouse him.

After Jakey had completed his first toilet—the only toilet either made—Mark led off on the railroad ties to Chattanooga. The railroad soon left the river bank, and they proceeded in a northerly direction, striking the town from the south.

A great many tents were in sight as they passed along, and Mark judged at once that there was a large force concentrated there. He was tempted to turn and retrace his steps, for he knew already what he was sent to discover, but to get out was more difficult than to get in, and he was not willing to risk an attempt in the daytime, so he entered the town in which citizen and soldier were alike asleep, and without meeting a soul walked about till he came to a hotel called the Crutchfield house. As he approached

the door opened, and a negro boy with a broom in his hand stood in the opening.

"Can I git a room?" asked Mark.

"No, sah, not till de proprietor wakes up."

"My little brother is tired; he must go to sleep at once."

The boy's eyes opened wide at a dollar bill slipped in his hand. Without a word he took a key from the rack above a door in the office, and in a few minutes both travelers were safely lodged, with no one but the negro having seen them enter the town or the house.

"So far, so good," said Mark. "Now comes the real racket. By this time tomorrow morning I shall be either safe across the river again, or I wouldn't give a Confederate band for my life."

After a few hours' sleep he rose, and calling Jakey they made a toilet and went down to breakfast. Mark had purposely neglected to write his name on the register, and hoped that the landlord would not notice the omission. But he did, and the guest entered his name as Mark Shack, Jasper, Tenn.

After breakfast he took Jakey and strolled around the town, making purchases. He thought it prudent to get some of his greenbacks changed for Confederate bills. He followed the suggestion Jakey had made at setting out and bought some calico and tobacco, and the squirrel gun Jakey had modestly suggested for himself.

Mark was astonished at the number of officers and soldiers he saw in the streets. He found a new general in command, of whom he had not heard as a prominent leader, Braxton Bragg. He made a circuit of the town and an estimate of the troops, but this was of little value, for upon the arrival of trains regiment after regiment marched into camp. Mark stood on the sidewalk holding Jakey by the hand, looking at the Confederates tramping along under the stars and bars, their hands, when they had any, which was rare, playing discordantly "Dixie" or "The Bonny Blue Flag."

"What regiment air that 'er?" asked Mark of a soldier standing beside him pulling at a rank sign.

"Eight Tennessee."

"Whar they all come from?"

"Tupelo. Come from thar 'mself a spell ago."

"Whar y' goen?"

"Only old Bragg knows, and he won't tell. Backen we're goen north to Knoxville ter foller th' two brigades ez went up a spell ago."

"What troops air all these hyar and them ez is comen?"

"Wah, thar's Cheatham's and Withers' divisions, and I reckon Anderson's. I saw General Polk today, 'n yer hyar de hyar, I'm in the Twenty-fourth Tennessee 'mself, and thar's Cheatham's. Lay's cavalry brigade is hyar. Thar's all the cavalry I knows on."

Mark was amazed. A large southern force was concentrating at Chattanooga, and perhaps they would pour into Tennessee or Kentucky by one of the routes pointed out to him by his general. It was a splendid plan, provided the general who was to execute it could keep his enemy from knowing his intentions long enough to throw an army on his flank or rear.

Then in making a circuit of the town Mark was impressed with the natural strength of the position. He gazed over the plain eastward, his eyes resting on Missionary ridge, but did not dream of the soldiers' battle destined to take place there a year later, when the men of the Army of the Cumberland, disregarding the plans of their superiors, would start from the bottom of that mountain and defeat an enemy pouring shot and shell down upon them from the top.

"Why didn't our generals occupy this place when they could?" sighed Mark. "Now it is too late."

While it was evident to Mark that the enemy were concentrating for a move against the Union lines, there was nothing to indicate where they would strike except the mention of the two brigades as having gone to Knoxville. He knew that they might strike any one of several points from Battle Creek to Knoxville, and eagerly sought for some indication where it would be.

He strolled about with Jakey all the afternoon, the two sufficiently resembling country bumpkins to avoid suspicion. Passing a recruiting station, Mark went inside the tent, where an officer was writing at a plain table.

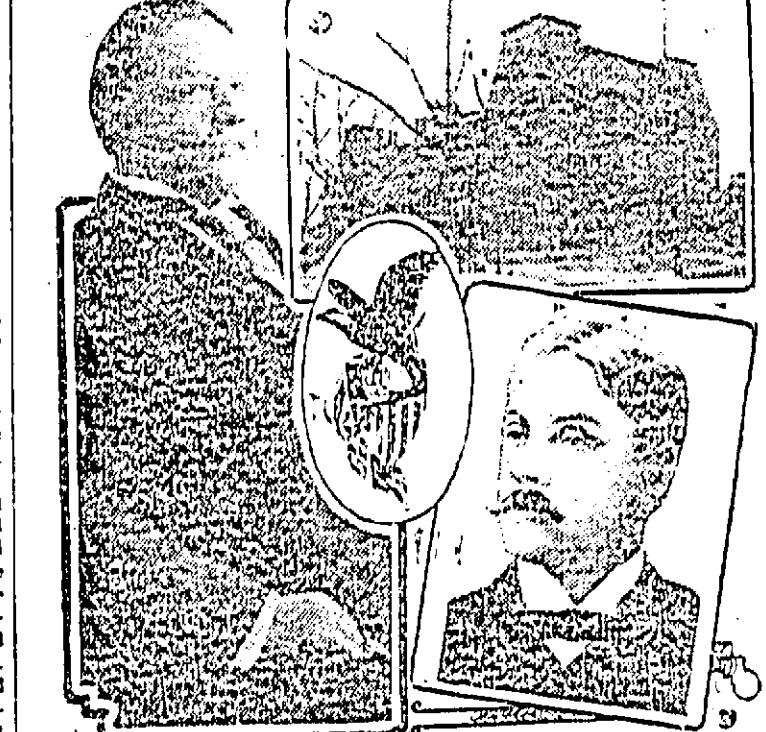

"Cap," he said, "I be'n thar 'n I'd like ter jine the army."

(To be Continued.)

Keep Temper Curbed.

Anger resteth in the bosom of fools.

—Bible.

G. A. R. NATIONAL ENCAMPMENT TO BE THE BIGGEST EVER. At left, President Taft, who will address the 45th National Encampment of the Grand Army of the Republic. Upper right, Convention Hall in Rochester where encampment will be held. Lower right, Commander-in-chief John E. Gilman of Boston.

Rochester, N. Y.—The 45th National encampment of the Grand Army of the Republic to be held here August 21st to 26th, is going to be one of the most interesting and successful ever held. Unusual effort is being made by the local men in charge to make this year's gathering an unusually enjoyable occasion.

As the old soldiers form for their grand parade on Wednesday, August 23rd, with President Taft and Governor Dix of New York in the reviewing stand, it will be noticed that their ranks are thinned, and many of the familiar figures who have for years attended this annual gathering are not present. But those veterans whose health will permit their attendance are assured of a grand, good time at their reunion.

The program opens Monday, Aug. 21st, with a reception in honor of the commander-in-chief and national officers. Tuesday will be devoted to many state reunions, and in the evening a big campfire will be held. Wednesday the grand parade of the veterans. Thursday more meetings and reunions of the different organizations. Friday business session and election of officers. Saturday trip and excursions to nearby points and farewell gatherings.

Extravagance. I heard a story lately of a highlander who had been persuaded to buy a ticket for a rifle. He won the first prize, a bicycle, but on being told of his good fortune, instead of laughing himself with delight he said: "Yoo, that's just nae luck, buying two tickets when yin wa'd 'a' done. It's just a saxepease wasted."—Dundee People's Journal.

Many a Suffering Woman Drags herself painfully through her daily tasks, suffering from backache, headache, nervousness, loss of appetite and poor sleep, not knowing her ills are due to kidney and bladder troubles. Foley Kidney Pills give quick relief from pain and misery and a prompt return to health and strength. No woman who so suffers can afford to overlook Foley Kidney Pills. Badger Drug Co.

The Cowling Fever Thermometer

will enable you to ascertain your Normal temperature. This will help you in time of sickness and thereby detect the symptom of the disease, in its incipience.

To own a Fever thermometer is a sign of intelligence. In taking the temperature of the human body, an accurate instrument should be used such as the Cowling Fever thermometer.

The Cowling fever thermometer is a Twentieth Century instrument, and has all improvements, since the first one used by Sanctorius at Padua in 1620.

For sale by the following Druggists: McCoo & Buss, W. T. Sherer, J. P. Baker, Smith's Pharmacy.

See that the name James Cowling, Galena, Ill., is on the thermometer.

A Language Struggle. G—In the Naples hotel, desiring a fresh towel, rang for a chambermaid and made his request in what he supposed was the language of the country. Meeting a blank face, he tried French and then German, but in vain. A little out of temper, he said: "Why don't you speak English?" "I do, sir," was the reply.—Travel.

Filling a Lamp. Reservoirs of oil lamps should never be filled to the brim, as oil expands when heated, and the overflow is apt to excite, causing a smell of paraffin, while to prevent the oil from flowing over the edge of the burner after the lamp has been filled the wick, after cleaning, should be turned down below the level of the burner until it is required to light it.

License, but No Muzzle. "He's got no license to talk the way he does." "Oh, he's got a license all right. What he lacks is a muzzle!"

TAKE IT IN TIME. Just as Scores of Janesville People Have.

Waiting doesn't pay. If you neglect an aching back, urinary troubles, diabetes, surely follow. Doan's Kidney Pills relieve back-ache.

Cure every kidney ill. Janesville citizens endorse them. Mrs. Elizabeth Johnson, 118 Terrace St., Janesville, Wis., says: "I was a sufferer from kidney trouble for ten or twelve years. My kidneys became sluggish and their failure to do their work properly, caused me to become weak and helpless. The kidney secretions were very unnatural and often my joints were sore and swollen. I had almost given up hope of getting relief when I had the good fortune to hear of Doan's Kidney Pills. I got a supply at the People's Drug Co. and they soon restored my kidneys to a normal condition. I advise other kidney sufferers to try this remedy." (Statement given in August, 1908.)

Confirmed Proof. Mrs. Johnson was interviewed on September 23, 1910, and she added to the above: "I take pleasure in again recommending Doan's Kidney Pills and advising their use in all cases of kidney trouble. I am still free from kidney complaint and my back does not bother me to any extent."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

They Will Agree with you—and help you to keep your stomach and other organs in the proper condition on which your good health must depend.

FARM AND BEES

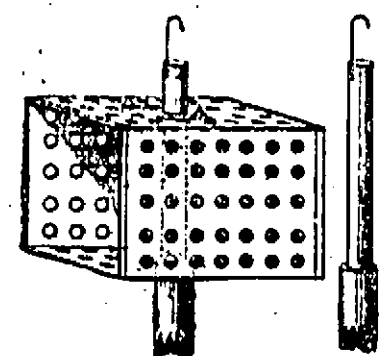

SWARM CATCHER IS SIMPLE

One Exhibited at Recent Maryland Beekeepers' Association Meeting—Made Any Size.

At the recent meeting of the Maryland State Beekeepers' association in Baltimore, Dr. B. N. Gates of the United States department of agriculture exhibited and described an apparatus for securing swarms. As will be seen from the illustration, it consists of a wooden box with holes in five of the sides, the sixth side being open, says the Orange Judd Farmer. Any convenient size will answer.

The box shown by Dr. Gates was about 16 inches long, 12 high and 8 wide. The holes were about an inch in diameter. At the top were two slots in which small pieces of comb filled with unsealed brood could be let down into the box and fastened so that they would not jar out. They are placed parallel with the long side of the box, so as to leave no obstruction when the bees are to be jarred out.

In the center of the bottom and the top of the box larger holes are bored for a pole to pass through.

A Simple Swarm Catcher.

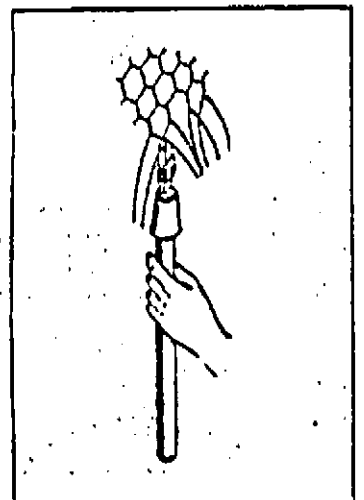

Several poles of varying lengths are provided, so as to reach high or low clusters of bees. When the pole has been put in place through the box a hawk is fastened to the top, so this may be hung over a limb if necessary. Preferably the edges should be bound with iron to prevent injury when the box is jarred to get the bees out.

In operation all that is necessary is to catch half a pint or more of bees in the box and let the box hang near where the bees have started to form a cluster. They will quickly assemble in the box by coming through the holes, and all that will be necessary will be to carry the box and dump the bees either into or in front of the new hive. The bees will take possession in the ordinary way.

WIRE TWISTER FOR FENCING

Spiral Shank Has Effect of Working Automatically and Swiftly—Especially Useful on Farm.

A novel form of wire twister that has the effect of being automatic in its operation has been patented by a Texas man. A spiral shank revolves as the device is drawn through the user and does the work swiftly. This implement is especially useful in making wire fencing, where it is

Wire Twister Is Novel.

necessary to have a few twists at close intervals. The head of the tool slips down into the hollow handle and is normally in a retracted position. To use the implement two or more wires are seized in the jaws and the operator draws the tool toward him. The resistance offered causes the head to wind its way out of the handle with the circular motion imparted by its spiral shank, and as this happens the wire is twisted automatically. This is a very much speedier operation than the method of twisting wire with a pair of pliers by turns of the wrist.

Use of Weeds.

Weeds in many cases have been blessings in disguise. They have taught us how to cultivate the soil, and they never allow us to forget the lesson: "Solomon went by the field of the slothful and by the vineyard of the man void of understanding, and, lo, all grown over with thorns, and tithes had covered the face thereof."

Scott's Marriageable Age.

In Scotland the legal age at which boys and girls may marry is 14 and 12 years respectively.

Force of Habit

On his way home that evening Brill unconsciously felt several times the crackling papers in his pocket. When ever he did so he would out his chest and remembered how relieved and happy and cheerful he was. For the first time since his marriage, which was six years before, Brill was entirely out of debt. He had that day paid the last note the bank held against him.

All those six years he and Ida had been paying for the house. They had bought it to start housekeeping in, in bold defiance of the advice of their elders, who bemoaned their loading themselves with debt at the very outset of their married life. If they wanted to do such a crazy thing, was the general cry, why didn't they go into it more moderately? The idea of two persons with their income purchasing a \$5,000 place when one costing \$1,200 would have suited their resources so much better!

Their relatives rehearsed the various calamities which might follow their rash venture. If John didn't die he might lose his job and what if either of them should have a long and lingering illness? Besides, both John and Ida were pleasure loving and never in the world would have the moral courage to make the necessary sacrifices.

In the first enthusiasm of having such a nice house to live in the debt did not loom ominous.

"Why," Ida said, early, "it's so perfectly splendid, having this instead of a stuffy four-room flat like everybody else has that I shan't mind giving up things a bit!"

That was at first. When days followed days they began to look at each other seriously over the papers covered with figures. They loved the theater and now they had to give it up. In fact they had to give up almost everything they had enjoyed, even their friends. If their friends entertained them it meant that they must entertain in return.

Life resolved itself into a grim struggle to make their payments. Ida's clothes got shabby and Brill learned to walk by a cigar case and keep his eyes straight ahead. They learned to stay at home evening after evening and they took to reading aloud as a diversion and to the multiplication table and long division as a necessity. So it had been a long, hard struggle and now Brill was glad it was ended.

"It seems queer," he said at dinner that night for the dozenth time, "to think that it's all over—that we haven't got to scrimp and pinch and save money for anything special! We can have a better time now!"

"We'll enjoy life," Ida said dreamily, resting her chin on her clasped hands. "Think of all the things we can do!"

"Well, what shall we do?" asked Brill.

His wife regarded him with a puzzled look. "Why, I don't know," she said, slowly. "All the things we've wanted to and couldn't since we were married, I suppose. And it will be fine not to have the worry."

They stayed at home that evening, still reading and discussing the fact that they were out of debt and removed from the necessity of scrimping. When Brill started downtown in the morning he remembered to throw out his chest as he descended the front steps, for did he not own his home and have his full salary to spend?

They had a fine time for a while discussing the treats they would have. They did go to the theater and they bought some new clothes and Ida joined a literary club. But after a while Brill grew restless.

"I don't know what's the matter with me," he said. "I guess it's just nerves. I don't feel right. Something seems wrong somehow."

"There doesn't seem much to do," his wife agreed. "I can't get up an interest in anything."

They grew silent and abstracted. Brill developed a habit of idly making marks with his pencil on the blank pad of paper on which they had done their figuring during the past year.

One night he came home late to dinner a little breathless, but with a light in his eye. He spoke rapidly and almost defiantly.

"I suppose you'll be furious at me," he said, "but I ran across a good investment where property is bound to go up—and I've bought a small store building for \$7,000 with six years to pay the mortgage and—"

"That's splendid!" interrupted his wife, excitedly. "We can do it just as well as not! I've thought of a new way to cut down our expenses and I'm dying to try it! I'll be fun to plan again and feel that we're really doing something!"

"Well," said her relieved husband, as he reached for the pad of paper. "It does seem to give one something to live for to be honestly in debt again and have to fight to get out!"

According to Scripture.

Mother came with slow and silent step from the sick room and said to little Robert, "Your little baby brother is very ill, Robert, dear, and I am afraid he will die."

"Well, mamma, if he does die he won't go to the bad place."

"Why, Robert, what makes you say that?"

"Oh, I know! You see, he can't, mamma, 'cause he ain't got no teeth to gnash!"—Judge.

Yields Carbolic Acid.

Puy-de-Dome, an extinct volcano in France, yields large quantities of carbolic acid.

Rather Trying.

"It is hard for a man to discover that he has no balance in bank, without losing his equilibrium."

Bright Child.

"I wish I was twins, mother, then half of me could do lessons, and half could play!"—London Punch.

Where Nature Slipped Up.

It is said that there is no waste in nature, but what about all that perfectly good ice in the Arctic regions?—Albany Journal.

Legislatively Expressed.

"No one can so wrong it as follows the Ten Commandments," said the sincere citizen. "Yes," replied Senator Sorghum, "the only trouble about the Ten Commandments arises from the amendments people try to tack to them."

Neighboring Anyhow.

Maybe it is design or maybe it's just accident. Anyhow, it certainly does look funny to see all the principal taxicab stations bank up against drinking fountains for horses.—New York Mail.

His Youthful Ideal.

The Boy Puzzle

By DR. J. S. KIRLEY

HIS TABLE OF CONTENTS.

His life is a volume and his contents voluminous. It becomes a story, an epic, in time; but to start with it has the disconnectedness of a dictionary. His contents are somewhat like the articles of an observation party, in their variety and seeming unrelatedness.

It would be rather easy to make out the list, if he were only a "little man," as he is sometimes playfully or patronizingly called. But he is not a "little man" any more than his pa is a "big boy," or a caterpillar is a little butterfly. He is a prospective man, an unfolded man, as his pa is an unfolded boy. The difference between him and a man is not a difference in quantity or quality, but the difference between enfoldedness and unfoldedness.

When he first starts out to be a boy, he is more like a little heart than a man, and the things that make the difference between a man and a beast make no difference to him. The saving fact, though, is that he is a man in embryo.

His table of contents has variety. It includes physical, mental, moral, aesthetic, and all the other powers that we know anything about.

In the list we must put love and hatred, hope and fear, aspiration, ambition, sense of justice and fairness, appreciation of the beautiful and sublime and true. In fact, there is not a power of the body or soul that we can leave out, and the reader may go on with the catalogue as far as his wishes, at his convenience.

But they are in the immature and curious stage when we are apt to mistake them for wholeness and leather and pig iron and cat gut and rag weed and sweet williams and morning glories. Yes, he is pretty well loaded.

And they are active, too, all of them. That state of agitation is sometimes called a state of flux, which means fluency. They are all at work, all the time. Some get started while the others are opening their eyes. One set of powers will have their way for awhile, then others will get into the lead. We cannot hold the watch and say "after six years and three days, the intellect arrived and got on its overalls ready for business," nor that "when the clock struck his twelfth year, his will was seen galloping up on a Mexican mustang, firing pistols in eight different directions and was heard announcing its purpose to take charge of things." No; they were all there at the start.

Let us not forget his contents are not very well acquainted with each other, not yet. Mutual misunderstandings take up much of his energy. The household of feeling gets into conflict with their neighbors, the judgment and the conscience. In the same group or household discords arise between different kinds of feelings. Filial sentiments prompt to obedience as a son, while the play or food appetite pushes him in a contrary direction. He often knows better than he does, or even wants to do. He will probably have that infinitely as long as he lives, but it may become less infirm, with the years. He may not become so poised that the remembrance of the stomach ache of the previous night will wholly restrain all desire for the food that brought it on. He is somewhat like the climate of the "Holy Land," as it was described in a boy's composition, thus: "The climate of Palestine is very hot and mountainous, especially where the country is flat." And his incongruities remind me of a funeral service I attended, conducted by two little girls over a chicken. Nanine was in charge, and she said:

"Little Willie was four days old when he died of cholera. He was a good chicken. We will now sing 'Johnnie Get Your Hair Cut,' and the two sang the song.

Further—he does not seem to be very well acquainted with himself yet. He hasn't time—too busy being a boy. He learns himself by piecemeal. He is sometimes shocked at what he discovers, sometimes awed and sometimes stricken with fear. When he discovers his ability to swear or do a mean thing, he often recoils so thoroughly as to never go near that sin again. He is sometimes shocked at finding what he lacks and what he cannot do. It is not conceit that is disappointed, but ignorance made aware of itself. We have all been as naive as that boy who, when asked if he could read Greek, replied: "I dunno, never tried."

Between himself and the thing thought of or desired, there is only a step, and he does not know that the law of cause and effect is in that step. He is ready to pilot a boat, handle firearms, and auto without license, and do any other daring thing.

The last thing to be said is that there is a power in him capable of coordinating and controlling all his various and curious and conflicting endowments; not yet, but before long. Till it awakes in its task, some one else must keep in control.

1. He is. 2. Read his table of contents to him now and then.

3. Tell him what each item means.

4. Let him play; more play. Play with him.

5. Be his ideal.

Rather Trying.

"It is hard for a man to discover that he has no balance in bank, without losing his equilibrium."

Bright Child.

"I wish I was twins, mother, then half of me could do lessons, and half could play!"—London Punch.

THRILLS FOR TOURIST

WESTERN RAILROADS OUTDO AMUSEMENT PARK DEVICES.

Rocky Mountains Being Turned Into Sort of Coney Island—Plan Hair-Raiser in Almost Every Mile.

Those enterprising individuals who have devised so many mechanical devices whereby the public is given thrills at summer amusement parks seem to have been outdone by western railroad men.

Recognizing the appeal of daring engineering feats to the average mind, these railroad men are taking advantage of the natural opportunities afforded by the Rocky mountains and are endeavoring to outdo each other in the construction of railroads and trains that will give the tourist a mingled sensation of wonder and fear.

The man who started the work of turning the Rocky mountains into a sort of Coney Island is the Rev. E. J. Wilcox, who stepped from the ministry to mine promoting, and from mining to a new form of railroading. Mr. Wilcox was interested in a mine not far from Silver Plume, Colo. A tiny narrow gauge railroad had been built from Silver Plume to the mine. Mr. Wilcox was enchanted with the view unfolded on his first trip over the line, which was used solely for the transportation of ore.

The railroad to the mine ended before timber line was reached, however, and Mr. Wilcox realized at once the advantage of extending the rails to the very crest of Mount McClellan, which is a shoulder of Gray's Peak, and which is only 200 or 300 feet lower than that mighty mountain. Railroad experts shook their heads, but the enthusiastic promoter raised the money for extending the line, in a series of switchbacks, to the altitude of 14,000 feet. Today the line ends on the very summit of Mount McClellan.

It is the highest regularly equipped and operated railroad in the world. There is a higher line in South America, which is not used for passenger service, and which is not operated regularly, but the Colorado line to the top of a mountain peak is used for mail as well as passenger service, and is in every respect a genuine railroad.

The engines used in negotiating the tremendous grades to the top of Mount McClellan are of the Shay mountain-climbing type, but are not equipped with cogs. The steeper portions of the climb are negotiated by switchbacks, which rise not unlike a series of steps in a gigantic ladder. By alternately backing and going ahead on these switchbacks the final altitude of 11,000 feet is reached.

It is intended to pile one thrill on another, however, by extending this line still farther. From Mount McClellan it is intended to extend the line along the rocky ridge extending to Gray's Peak itself. Gray's Peak is one of the highest mountains in the Rocky mountain range, and years ago, was used as a weather station by the United States government. The peak is considerably higher than Pike's Peak.

It is believed that trains can be run to the very base of the final pinnacle of Gray's Peak, and that the last 200 feet can be negotiated by means of an elevator. A hotel and observatory will be built on top of the peak and astronomical observations, will be taken in the remarkably clear atmosphere.

The utilization of the mine railroad for passenger traffic suggested an idea to other mine owners on Mount McClellan who transported their ore in trains. One of these concerns, whose steel cable stretched a mile or more up the steep side of Mount McClellan, began carrying passengers up in the ore buckets. Here was a new thrill with a vengeance, and the mine owner soon began reaping more profits from human freight than from his ore. Now he does a big business all summer long, swinging people up and down the mountain side in huge, heavy ore buckets.

Change to Oil Burners.

Most of the Canadian steamers on the Pacific are being converted into oil burners. It is also intended that the locomotives of the Pacific division of the Canadian Pacific railroad may be converted to burn oil.

Culture Will Out.

A young man confined in a Pennsylvania jail proved his refinement by using a spoon to pick his cell lock and escape. Well-bred persons never forget their table manners. Some men would have used a knife had they been situated as the Pennsylvania prisoner was.—New York World.

Cork the Beauty Center.

For feminine beauty go to Cork. On the occasion of her first visit to Ireland—in 1849—Queen Victoria wrote of the women of Cork: "The beauty struck us much; such beautiful dark eyes and hair, and such fine teeth; almost every third woman was pretty, and some remarkably so." Of the women of Belfast there was less to be said, nothing more than: "The people are a mixture of nations, and feminine beauty had almost disappeared."—London Chronicle.

The affectionate lovable, Madonna-like Mona Rees.

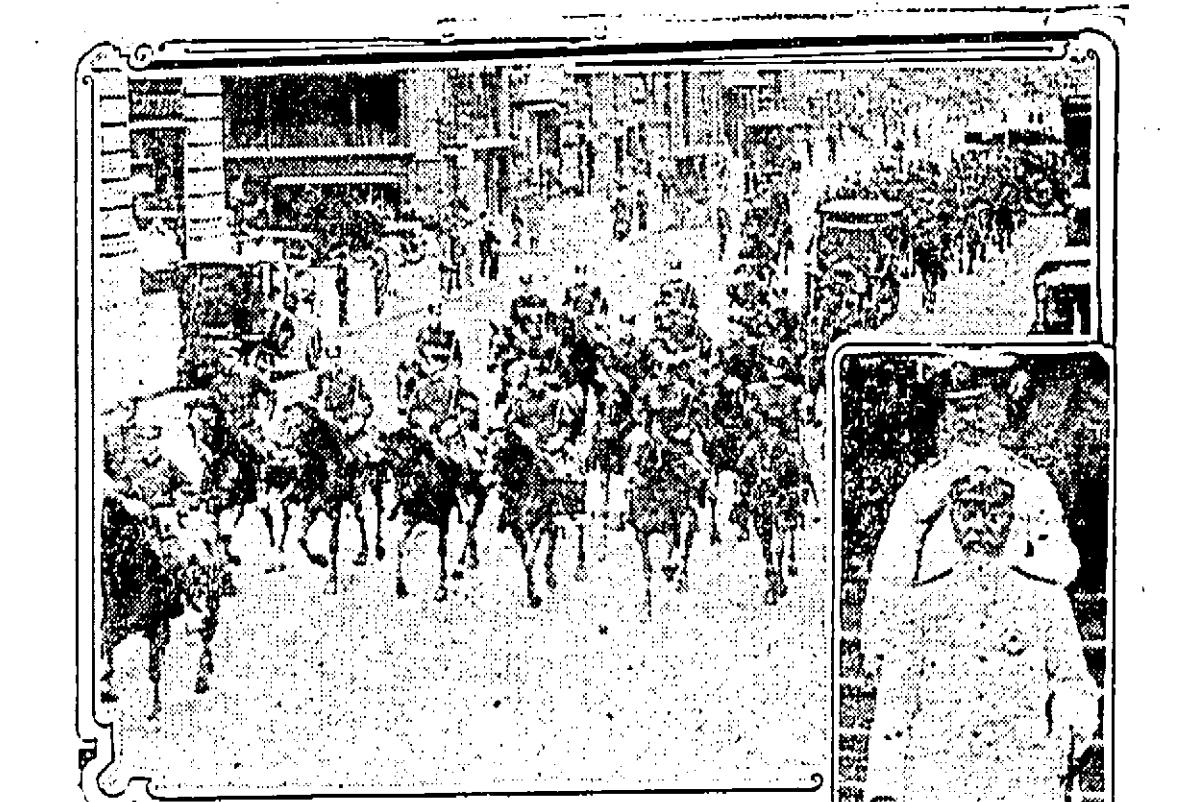

The determined, cunning, tragic side of Mona Rees.

DUAL PERSONALITY OF "PERFECT WOMAN."

Chicago, Ill.—The girl who, leaving all youthful hopes behind, has sacrificed herself to save the gray-haired "prophet" Evelyn Arthur Rees, founder of the "Absolute Life" cult, possesses a dual personality, which has puzzled judge and lawyer and jury. Her face, taken as a whole, has been described as Madonna-like, expressing love and meekness. An analysis of the face, however, gives a totally different impression. In fact, in one face is combined a dual personality.

The right side of her face, as pictured above at the left, is the side which expresses all the qualities mentioned above. But the left hand side of her face is a different type. This eye is keen and penetrating, the expression is cunning, determined and somewhat willful, and this is the side which juror and judge have been unable to fathom. Her testimony in upholding the gray-haired "prophet" so gallantly on the stand will have much to do in convincing the jurors of the guilt or innocence of Rees.

The girl has faced the shame of public confusion and by her murmured details has failed to deny unprintable questions—all for the sake of a man was given by her mother for safe keeping, twice her years, to whom her soul

TRAFFIC POLICE ESCORTING ADMIRAL TOGO TO CITY HALL.

WELCOMING ADMIRAL TOGO IN NEW YORK.

At top, Traffic policemen escorting Admiral Togo down Fifth Avenue to City Hall to meet Mayor Gaynor.

ADMIRAL TOGO LEAVING CITY HALL.

GRAND JURY AND POLICE FORCE PAY HOMAGE TO MURDERER.

The persons, from left to right, are: standing, Police Commissioner Joseph Sullivan, E. W. Brown, Attorney Rees, M. Stern, Chief of Police White, John Holland, H. L. Morrison and Henry Appel. Seated, Foreman C. S. Frantz of the grand jury, Anna Gaffney Langley, and Olphonse Hirsch. San Francisco, Cal.—The exoneration of Mrs. Anna Gaffney Langley by the grand jury brought to a climax one of the most spectacular cases of California police annals.

Mrs. Langley killed her husband because of his taunts and his attempt to make her lead a life of infamy in order that he might live at ease. Sentiment over the entire state has been aroused to a high pitch for the defendant. The grand jury not only exonerated her, thereby overstepping the

head of the law for a higher law which governs mankind, but gladly consented to have a flashlight taken of themselves with the defendant showing her the evening of her release from prison in the midst of friends and sympathizers including the grand jury, the chief of police and other prominent citizens. The flowers which she holds so tenderly are but a part of the vast floral tribute given her by sympathizing friends.

Cruel and Unusual.

"Saw off the handle of an old broom," says the Farm Journal, "and use it to brush your horse with after you have been over him with a comb and brush of the regular kind." Anybody who would use the handle of a broom to brush a horse with ought to be turned over for treatment by the S. F. T. P. O. C. T. A.

Legislatively Expressed.
